WHAT ACTIVITIES AT LCC DO YOU FEEL HAVE PRESENTED YOU WITH PROFESSIONAL GROWTH OPPORTUNITIES? -Jay Marston, an instructor in the Science Department, says his work in the Science Quality Circle has helped him and his department. The quality circle "allows me to have a better perspective of problems in the department and makes me see that there are no easy, quick answers to problems - but there is a scientific process one can use to come up with the best possible solution," he says.

Coordinated by the Productivity Center, quality circles are entering their third year at LCC and continue to stress staff involvement in problem solving and decision making in work units. This term, seven quality circles are meeting weekly. Each group has 4 to 12 members. The Productivity Center, with assistance from Staff Development, trained 10 new facilitators Jan. 26 and 27. If you are interested in joining an existing quality circle or starting one in your area, call the Productivity Center at ext. 2576.

**OREGON EXTERN PROGRAM** - The Oregon Extern Program is looking for a few good people! Three LCC staff members have answered the call: Leslie Razor, coordinator, Community Education; Pat Murphy, Aviation Maintenance instructor; and Sharon Moore, CWE coordinator for the Business Department. Moore completed a special project for Cooperative Work Experience and the Business Department, and feels the Extern Program "brings you up to date on current methods and practices in Oregon education."

The Extern Program is a leadership development and professional growth program for vocational educators and trainers. Participants in this year-long program observe exemplary programs and techniques, meet and interact with key personnel statewide and develop a project to be implemented within their schools.

To qualify, participants must receive encouragement, release time and some financial support from the agency or business by which they are employed. With completion of the program, nine hours of graduate credit may be earned.

Applications for the Oregon Extern Program must be submitted no later than April 15. Information and/or applications are available in Staff Development, ext. 2577.

**TECHNICAL SKILLS UPDATE: MINI-GRANTS** - Want to visit a business, industry or agency to learn new skills? Need to take a class for recertification or want to update your technical skills? Stipends of up to \$75 for these purposes now are available to vocational instructors from the Oregon Department of Education through the Lane Education Service District and Staff Development. Last year, 16 LCC staff participated in this opportunity and \$1,373 was spent.

George Alvergue, Social Science, requested a technical skills mini-grant to visit power plants in Washington, Oregon and British Columbia to familiarize himself with the interworkings of coal burning and hydroelectric power plant and their tie-in to the Bonneville Power Administration supply system.

Albert Rowe, Industrial Technology Programs, helped fund the "High Technology Welding Application" show held at LCC last February. The show provided participants exposure to high technological developments in the welding and fabrication fields and encouraged further education and understanding of future industrial practices and trends.

Funds for mini-grants are limited, so early application would be wise. Any activities planned must be completed by the applicant by June 15, with claim forms and evaluations due by June 30. For further information and/or applications, call Staff Development at ext. 2577.

If you're planning on taking Sandra Ing's two-hour first aid class Feb. 7, then be sure to sign up now. The class is scheduled on campus from 2 to 4 p.m. Call Staff Development, ext. 2577.

This column, prepared for the staff of LCC by the Staff Development Office, is published every first and third Wednesday. Article contributions from the staff are welcome.

## FACULTY--FOR YOUR EYES ONLY

Picture yourself living and teaching in NEW ZEALAND, AUSTRALIA, CANADA, SPAIN, or any other country where the language of instruction is English. This is indeed possible through the FACULTY EXCHANGE CENTER, which serves as a clearinghouse and publishes a directory containing the names of instructors as well as their institutions, rank and field of specialization. The directory also mentions the region where the faculty members prefer to teach and travel, whether they are retired and if they are willing to exchange houses.

The Staff Development Office is accepting applications from faculty members who wish to be listed in the FACULTY EXCHANGE DIRECTORY, for exchange in foreign countries or within the United States.

Applications should be completed by the end of February to insure inclusion in the Fall 1984-85 directory. Only TEN openings are available to LCC faculty, so call the Staff Development Office, ext. 2577, to reserve a spot.

## WHAT ACTIVITIES AT LCC DO YOU FEEL HAVE PRESENTED YOU WITH PROFESSIONAL GROWTH ACTIVITIES?

MARY CUDNEY, Serials and Reference Assistant in the Library, has been Chairperson of the Guidelines Task Force of the Staff Development Advisory Committee since March 1983. Chairing this committee has enabled her to meet staff from across campus and has given her more perspective on opportunities available to herself and other staff. She says it also has improved her confidence and self esteem.

The GUIDELINES TASK FORCE originated after a survey in early 1983 indicated few staff were aware of employee training and development opportunities available to them at LCC.

During summer and fall, contacts were made in all areas of the college for input on a document to clarify the existing opportunities, and all levels of management were encouraged to review the first draft of the document with their staff.

A second draft of the Employees Training and Development Opportunities (ETDO) document will be out for review this term, with a final edition to be printed and distributed to staff the end of spring term 1984. Sixteen department meetings have been scheduled in February for the Guidelines Task Force to present the ETDO document to staff for their feedback.

Anyone interested in more information may contact Guidelines Task Force members Mary Cudney, chair, Deborah Holmes, BAC, or Anne Stewart, Staff Development Director.

## JOIN A COMMITTEE--LEARN WHAT NEW THINGS ARE HAPPENING AT LCC

DAVID CROFT, JUDY DRESSER, and TRICIA HAHN have been selected to join the Staff Development Advisory Committee for a two-year term. Why do people decide to devote three to five hours a month to sit on a committee?

DAVE CROFT, an instructor in Social Science, was motivated by a desire to represent the faculty in staff development. Dave feels that staff development is even more important now than in the past to LCC faculty because most of them have been with the college many years and they tend to become burned out without opportunities for self renewal. He sees this as a challenge for the Staff Development Office.

Being a relatively new staff member, TRICIA HAHN, CWE Coordinator, had a desire to become more involved in campus organizations, interact with staff members throughout LCC and explore her personal interest in staff development opportunities.

JUDY DRESSER, Department Head, Home Economics, has expressed an ongoing interest in staff development as her motivation in joining the advisory committee.

Two classified vacancies exist on the Staff Development Advisory Committee. If you are interested in joining this dynamic, hard-working group, contact the SD Office at 2577 for information on memberships. If you would like to be nominated to fill one of these vacancies, contact George Smith at ext. 2558.

## ANNOUNCING LEAGUE FOR INNOVATION INNOVATOR OF THE YEAR AWARD

The League for Innovation in the Community College has created an award that is designed to recognize League College staff members who have designed and implemented a significant innovation during this past year. The recognition is known as the Innovator of the Year Award, and is given annually to one individual from each of the 18 League member college districts. Any current Lane Community College employee, part-time or full-time, may be considered for the award.

The recipient of the Innovator of the Year Award will receive a plaque from the League for Innovation to be presented at an appropriate LCC function. The award winner will also be featured in the League publication, JOTTINGS.

Last year's award went to Spanish Instructor Arden Woods. She implemented the use of the computer in her Spanish instruction and has developed a program that is of interest nationally.

The deadline for nominations is March 16.

## CALL FOR NOMINATIONS

### WHO MAY NOMINATE?

Nominations may come from anyone either inside or outside the college.

### WHAT ARE THE SELECTION CRITERIA?

The award will be given to an individual who has designed and implemented a significant innovation at LCC. The League has established the following criteria for making their selection from among nominees. PLEASE NOTE THAT ONE OR MORE OF THE CRITERIA SHOULD BE MET, BUT IT IS NOT NECESSARY THAT ANY NOMINEE SHOULD MEET ALL CRITERIA.

1. Quality - Students and/or staff agree that the innovation increases quality in the course program, office or institution. Evidence of quality may include student ratings or letters of support from colleagues.

(over)

2. Efficiency - There is evidence that the innovation or outstanding program contributes to a more efficient way of doing things. Student ratings, perceptions of outside consultants, and pre- and post-comparison of time involved are examples of evidence.
3. Cost effectiveness - There is evidence that the innovation adds a value to the institution while at the same time containing or reducing costs. Cost data will serve as evidence.
4. Replication - The program selected can be used by other institutions with a minimum of difficulty. The description of the program should include any conditions necessary for replication.
5. Creativity - The selected program should be as original as possible or the adaptation should at least be creative. The description of the program or letters from experts are examples of evidence.
6. Timeliness - The award-winning program should not be more than five years old at that institution, but it must have been around long enough to have been tested so that it meets most of the criteria.

#### HOW WILL THE WINNER BE SELECTED?

LCC's Innovator of the Year Award Selection Committee will review the nomination and supporting materials and select one award winner by April 15 of each year. The committee will invite and encourage high quality nominations, and in the event no nominations are deemed to be of a caliber worthy of nationwide recognition, no award will be made that year.

The selection committee consists of three LCC employees representing management, faculty, and classified personnel and two members from the community. Larry Warford, League representative, chairs the committee.

#### HOW ARE NOMINATIONS MADE?

Nominations should consist of the name and department of the innovator and a one-page description of the project, process, item or activity supported by relevant materials. If materials are visual, or in some other form, it may be necessary for the nominee to make arrangements for the Award Selection Committee to have access for viewing purposes.

Nominations should be directed to League representative Larry Warford (President's Office, Administration Building).

#### WHAT IS THE DEADLINE FOR NOMINATIONS?

March 16

If there are questions about this award, please contact Larry Warford, ext. 2302.
