REPORT BODES WELL FOR COMMUNITY COLLEGES

Since community colleges serve most of the older, part-time students in Oregon post-secondary education, they are anticipated to profit most from growing numbers of prospective students in those categories. That conclusion is from a recent report, "Population and Enrollment Trends in Oregon Education," from the state Office of Educational Policy and Planning, which is headed by former Oregon Community College Association Director Roger Bassett.

The report indicates that, since 1970, there has been an increase of 145 percent in the number of students enrolling part-time in Oregon colleges and universities. About 80 percent of part-timers enroll at community colleges.

Number of students 36 years or older attending college has increased by 300 percent in the last 18 years. About 75 percent of students over 36 attend community colleges.

Largest percent increase, 52, of anticipated new enrollment growth in coming years is in the 45-64 age group. Most are expected to choose community colleges.

TUITION INCREASES COULD SEND STUDENTS TO COMMUNITY COLLEGES

If the State System of Higher Education boosts its tuition costs in 1989-90 as is being discussed, it could cause some students to switch to community colleges. Oregon Community College Association says that's what happened in 1981-83 when OSHE last approved a major tuition increase. OSHE is talking about a 8.25% hike the first year and another 8.25% in the second year. It amounts to about \$99 a term.

PEOPLE ON THE MOVE

Jacquelyn Belcher, Vice President for Instruction, was a speaker at a Economic Equity for Women conference last month at Willamette University at Salem....Linda Waddell, Director of Financial Aid, is a member of an Oregon Community College Association task force to develop Legislative presentations on the impact of state financial aid on community college students.

Robert E. "Bob" Hamill, LCC Acting President in 1968-69, has virtually recovered from the brain cancer that caused him to retire from the State Department of Education two years ago. A magnetic resonance imaging (MRI) test showed no sign of cancer and the therapy has been stopped. BOARD, RATHER THAN CONSULTANTS, TO LEAD PRESIDENTIAL SEARCH

LCC's Board of Education will rely less on consultants and, instead, get its total membership more involved in the selection of the next College President. At its meeting last week, the Board voted to establish a 20-member Search Committee, which will include all seven Board members. Eight others from the College will be selected and five people from the community. College representatives will include two faculty chosen by LCCEA, two Classified chosen by LCCEF, two managers chosen by the Management Group Steering Committee, and two students named by ASLCC, one from the ASLCC Board and the other from the student body at large. Community representatives will include a person recommended by the Lane County Labor Council, a person recommended by the University of Oregon President, a K-12 education person recommended by the Superintendent of Lane Education Service District, and two business or professional people--one recommended by the Lane County Chamber of Commerce and the other recommended by the League of Women Voters. No consultant has been hired yet, but the Board seemed impressed by Ms. Pat Fitzwater of the Oregon School Boards Association at Salem. That organization has advised on several recent Oregon presidential searches. Discussions will continue at the September 14 regular Board meeting at 7:30 p.m. in ADM 216. The session is open to the public.

THANKS TO VOLUNTEER RESEARCHERS

More than a dozen people helped conduct intercept research interviews last Saturday to help LCC Advocates learn how citizens feel about the College's proposal for a new tax base at the November 8 election. More than 400 people shared their opinions in four areas of Eugene. They were quizzed as they entered Safeway and Albertson's grocery stores. Results of the survey will be shared as they become available. Advocates who organized the research included Chris Pryor, Rick Lindholm and Scott Carpenter. Student interviewers included John Millet, KoLynn Dornan, Kimberly A. Hersh, Michael K. Stewart, Andy Harris, Bette Dorris, and Joanna Russell. SHORT-TERM TRAINING WINS PRAISE

A representative of the Agency for International Development visited LCC earlier this month and left highly impressed with the College's flexibility and willingness to offer short-term training. Grace Langley of Washington, D.C., AID Training Consultant, wrote Industrial Technology Chair Carl Horstrup to salute that department's programs, particularly the construction program for Jamaican women. "I was very impressed with LCC's staff and particularly those associated with the Jamaicans," she wrote. "They were experienced in their technology and developed splendid relationships with their visitors." She has referred LCC to nine additional contractors with the Latin American Peace Scholarship Programs, to the end that LCC may be able to contract for additional short-term training programs.

HORSTRUP REPRESENTS OREGON ON NATIONAL COMMITTEE

Governor Neil Goldschmidt has appointed Carl Horstrup to an indefinite term as Oregon representative to the U.S. Department of Education National Steering Committee on Vocational Apprenticeship Training. The Committee is to establish ways for expanding communication between vocational education and apprenticeship programs. Horstrup is to share with the Committee what Oregon is doing in these areas and gather data on what other states are doing. He reports quarterly on his findings to the Governor's Executive Assistant for Education and to the State Apprentice-Related Training Advisory Committee. Horstrup was nominated for the appointment by the State Department of Education. At LCC 12 years, he has coordinated apprenticeship training, and also chaired Industrial Technology for the past five years.

Negotiations between the College and LCCEF, which represents Classified employees, regarding a new contract have reached the fact finding stage. A hearing by a state fact finder will be held September 6, with recommendations to be made up to 30 days later. The use of an impartial mediator follows initial bargaining which did not result in a settlement.

MAKE THE MOST OF YOUR NEXT DOCTOR VISIT

Building an open and honest relationship with your doctor is a long-term investment in your better health. Here are some ways to make the most of a office visit: 1) Be honest and open. If you have trouble finding words to describe how you feel, bring along a relative or friend who can help explain. 2) Be prepared with descriptions of how you feel and with questions. You may even want to bring written notes with you. 3) Know your medicines. This can be very important, especially for persons on several prescriptions or over-the-counter medicines. 4) Follow doctor's orders. Once you have seen the doctor, don't waste time, effort and money by disregarding the doctor's orders. -From Marie Nelson, Personnel Services

A+ for Cushy Shoes

Lighter doesn't always mean better, at least when it comes to running shoes. As reported by HEALTH Magazine, researchers at the University of Tennessee at Knoxville tested two different types of running shoes. They found that runners wearing heavier, well-cushioned shoes used about 2.4 percent less oxygen than those in lighter, non-cushioned ones. They attributed this lower demand for oxygen and energy to air cushions, which helped the runners' feet to rebound faster.

Researchers also applauded the heavier shoes for providing added protection from injury by reducing the force of impact.
