Week Five of Winter Term

ON SHARED DECISION-MAKING: Excerpts from President Jerry Moskus' speech to staff on Martin Luther King Day, January 20, 1992

Shared decision-making rests on the same assumption that valuing diversity rests on, the assumption that all people's thoughts and backgrounds and beliefs are worthy of respect and deserve to be considered.

Shared decision-making has rules that are quite different from the rules that govern the political process, where almost anything goes.

The first rule is to respect the individual. You never know where the best answer will come from.

Everyone involved in the decision must know the institutional big picture...to understand the strategies and directions and constraints of the institution before they're asked for answers.

The third rule is that for shared decision-making to work, there must be shared values.

The fourth rule, and perhaps the most difficult to follow, is that shared decision-making is a group activity. Shared decision-making requires us to develop skills in groups processes: committee work, conflict resolution, cultural sensitivity, and so forth.

The final rule is that everyone must assume the responsibility for making shared decision-making work, because it is a very delicate process that can be severely injured by even one person violating its principles.

People who engage in [devisive] activities are violating their responsibility to foster shared decision-making. They are the enemies of shared decision-making, which is a process of reasoning and debating together civilly in an atmosphere of mutual respect.

To make shared decision-making work, we're going to have to be willing to hold it as a higher value than any other single thing we are committed to, and that's difficult for you and me.

ON GARBAGE CAN DECISION-MAKING:

When a decision is to be made, all kinds of problems and solutions and people get thrown into the big can that is the decision. The decision is a pure, simple one, at least on the surface, but in the garbage can it gets stuck to some other problems and solutions and people. Nearly everyone who touches this decision will throw a problem or concern or solution into the garbage can until the apparently simple problem becomes a complex mass of garbage.

People often wait for someone to open up a decision garbage can so they can throw their favorite solution in. In other words, solutions often precede problems.

Shared decision-making may be a garbage can word. That is, it may be a receptacle into which all of us have thrown all kinds of things and now it's starting to stink and needs to be dumped. One person's garbage is another person's prize.

One piece of garbage in the can is the simple desire to be left alone--no more interference from supervisors. But, that's not shared decision-making, because shared decision-making requires that you share. You can't be an isolationist.

Another item in the shared decision-making garbage can is personal power. Some people view shared decision-making as a means of increasing their own power and influence within the institution, or reducing someone else's power. Shared decision-making is a means of empowering people, but not at the expense of others. A student has as much right to be heard as a department head, but the student doesn't become more powerful than a department head, and the department head doesn't lose his or her job-related responsibility to make decisions.

Yet another group of people lurking in the shared decision-making garbage can are the politicians. For them, shared decision-making is an opportunity to turn the institution into a democracy where we will vote on everything. Having a say differs from having a vote. Shared decision-making is the repudiation of the political model of institutional governance, where people band into pressure groups and play political games to get their way.

In this metaphor, the decision-maker is a garbage collector, charged with going around the institution collecting the decisions and taking them to the institutional dump.

The garbage collector can't control what people are going to throw into the can. He or she has to be willing to accept what comes, whatever that may be.

The decision-maker has the responsibility to make the rules on how the garbage will be packaged, the right and responsibility to define what form the inputs will take.

He or she also has the right to say when the garbage can will be dumped, when the decision will be made--to set schedules and deadlines.

The garbage collector as decision-maker also has the responsibility to protect the institutional dump. If someone throws something into the decision process that will harm the institution, the decision-maker must remove it.

And what are the responsibilities for the garbage producers, or stakeholders? They must use the can and not throw their input all over the street. They must follow the rules and schedules established by the garbage collector. Beyond that, they have the right to throw into the can anything that won't harm the institution, and the garbage collector/decision-maker must accept it for consideration, even if he or she doesn't want it.

MAKING SHARED DECISION-MAKING WORK

There are three conditions we have to achieve. The first is an atmosphere of trust. The second condition we have to strive for is stability. Instability is the enemy of shared decision-making. You avoid instability by careful planning, and that's the third condition we have to achieve.

We've got to recycle garbage can decision-making into a new and better system, and we are, and we will.

VALLEY RIVER EVENT POSTPONED - The college will not hold the Valley River Center Open House which had been scheduled for this weekend, Feb. 8 and 9. The decision came out of College Council after a lengthy discussion at its Tuesday meeting.

In other business, Council supported a proposal to use The Daily to report shared governance news and events. A fourth issue may be added. Electronic communications also will be used.

In a continuing review of Shared Decision-Making Task Force recommendations, Council refined its mission statement to reflect that Council's primary responsibility is formulating and recommending college policy to the president. The statement had read that Council was the primary body to formulate and recommend policy, but other groups and individuals share that responsibility.

A proposed Faculty Evaluation Task Force was approved by Council. The task force is needed to develop a faculty evaluation policy that meets new requirements in college accreditation and maintains accordance with the faculty contract. The faculty contract itself probably won't need to be revised, said proposal spokesperson Julie Aspinwall-Lamberts.

A question was raised as to whether such a task force should examine evaluation of other employee groups as well, but it was pointed out that an evaluation system already is in place for classified staff, and one is being set up for management. Council will continue the discussion at future meetings.

Also at the meeting, Council reviewed the board agenda for Feb. 12, and postponed a discussion of board policy handbook revisions due to lack of time.

Council meets again Feb. 18 from 1:30-3 p.m. in PE 205.

VALLEY RIVER COMMENTS - Joyce Kofford of Student Services has served as the coordinator of the Valley River Open House for the past few years. To all the people who were willing and prepared to go, my most sincere thanks. I believe that the Open House is the best tie we have to the community. There is a thrill that stirs your soul when you see the staff of Lane Community College working on a common goal. With that thought, we put the Open House to bed for 1992. To those who will come after us, may you treat 1993 with tender loving care."

MEET THIS YEAR'S STUDENT AMBASSADORS - Meet Shane Barnard and Scott Westfall, this year's student ambassadors for High School Relations. They make presentations to high school students and lead campus tours. Both are enthusiastic about Lane as a result of their own positive experiences here. Please welcome them!

Shane Barnard

Shane is a 1990 graduate of Sequim High School in Washington state where she was active in sports, Pep Club, Spanish Club, journalism and theater. She is a full-time second-year student studying nutrition and dance before transferring to the UO. She enjoys the friendly atmosphere at Lane and the opportunities for practical experience in dance. She participated in nine dance performances last year. When talking with high school students, she stresses the valuable attention and hands-on experience offered by Lane's small classes.

Scott Westfall

Scott graduated from South Eugene High School in 1988 where he participated in band, choir, and the cross-country varsity team. He was a physical education major at Lane before changing to radio broadcasting with additional courses in video and photography. He chose Lane because it offered the program he wanted at a reasonable cost. He emphasizes Lane's quality of instruction and personal attention in his high school presentations and has a lively sense of humor.

Week Six of Winter Term

College Council supported using The Daily to report shared decision-making news and events at its Feb. 4 meeting. In addition to meeting announcements, agendas and reports in the regular Monday-Wednesday-Thursday issues, a fourth issue such as this one will be published from time to time to provide more in-depth coverage. Today's Daily is devoted to answering some of the shared decision-making questions that were raised on Martin Luther King Day but for which time ran out.

The first four questions have been answered by President Moskus.

Question 1: Several people said they would like to hear your specific personal beliefs about good decision making.

Answer: For many years, I was puzzled by the fact that apparently "good" decisions often turn out badly and "bad" decisions sometimes turn out well. Then I began to realize that it's not so much a matter of what decision you make as how it is carried out. A bad decision will work if everyone supports it and a good decision will fail if everyone opposes it.

This realization led to my belief in the power of shared decision making. The key is commitment, and you get commitment by involving the people who must carry out a decision and who will be affected by it.

I also believe that there are no perfect decisions, because there is never perfect knowledge of the effects of a decision. Every decision is a trade off in which we gain something and lose something. Most of the problems we have at LCC now are the result of "good" decisions made in the past.

Finally, I believe strongly that a group can make better decisions than an individual--that collective knowledge is superior to individual knowledge.

Question 2: What is the lowest level you perceive shared decision making being implemented? Is this process primarily for major college decisions only, or within departments and divisions? Morale falls when decisions are made at department levels affecting employees who have no input in the decision. This totally negates the concept and trust level.

Answer: Shared decision making is not just for major college decisions. Shared decision making should permeate the basic work unit. People work hardest and smartest when they are empowered and have some control and influence over their own work situations. People also commit themselves to decisions they have influenced or participated in. Commitment leads to decisions that work. The Task Force on Shared Decision Making believed that shared decision making will yield optimum benefits for the college only when it is practiced throughout the organization.

Question 3: Middle managers need clearly defined boundaries around their areas of responsibility. Devising a shared decision-making strategy for meeting those responsibilities seems to be part of their jobs. Would you, with the VP, be willing to define boundaries of responsibility?

Answer: There is a way to clearly define boundaries called a "responsibility matrix." It involves listing certain decision topics (e.g., scheduling of classes, staffing of classes) down the page and then listing parts of the decision-making responsibility ("announces the need for a decision, gathers information, makes decision, etc.") across the top. Positions within the institution (VP, department head, faculty, staff) are plugged into each cell to indicate who has responsibility for each activity. I have long thought constructing these matrices would be a useful exercise both in the administrative structure and the committee structure, and I will discuss defining boundaries in this way with the VPs.

Question 4: What is the difference between shared decision making and total quality management (TQM)?

Answer: Shared decision making is a philosophy, a concept, an ideal. TQM is a process, one method or tool for implementing shared decision making. TQM emphasizes process, quality and planned change.

There is a danger of confusing any one process with shared decision making itself. When we focus on a particular process we can easily lose sight of shared decision making or narrow its boundaries. On the other hand, if we have no processes or tools to call on, we cannot implement shared decision making. TQM is just one process for shared decision making that happens to fit many of Lane's values and goals.

The fifth through seventh questions were answered by Mike Hopkinson, co-chair of the Shared Decision Making Task Force.

Question 5: The terms "shared decision making" and "shared governance" seem to be used interchangeably. Are they really the same?

Answer: No. At least not in the view of the Shared Decision Making Task Force. At other colleges using similar systems, "shared governance" seems to mean only decisions relating to general institutional policy. In some other institutions, "shared governance" involves only top administrators. LCC's shared decision-making model refers to all decisions, whether policy or operational, in which stakeholders have an interest.

Question 6: What is it going to take for staff to buy into shared decision making?

Answer: First, individual staff members need to be aware of and understand the goals of shared decision making and its process. Written descriptions are available and training is being planned.

Second, the staff will need to see operational instances where shared decision making is used and works. On MLK Day, Jerry Moskus and at least one of the panelists cited such instances which have already occurred.

Third, individual staff members will need to initiate or participate in the process with their own ideas and concerns. These opportunities are available by volunteering for campus committees and task forces or serving when asked, or by using the process in department meetings.

Question 7: When will shared decision making become a practical means of making decisions?

Answer: Shared decision making is and always has been a practical means of making decisions. Some departments have used this process for many years. Current advisory councils such as the College Council and the Faculty Council use this type of decision making. The Board of Education and Jerry Moskus have endorsed the shared decision-making concept for LCC, and as more staff understand the operational elements of the process, it will become a more widely-used practical means of decision making.

How do you punctuate it? Shared decision making or shared decision-making? The President's Office has adopted this style guideline: If used as a noun, don't hyphenate. If used as an adjective, do hyphenate. For example, "We use shared decision making at Lane." But: "We are working on a shared decision-making process."

SMOKING POLICY TO BE DISCUSSED, NOT VOTED ON, AT BOARD MEETING - The Board of Education will discuss the smoking policy at 7:30 p.m. tonight, but not necessarily take action. The reason for this is Board Policy 1320.1 which says, "...a policy or bylaw shall not be voted on at the first meeting during which it is discussed..." and "After discussion has revealed the sentiment of the board...the president shall be instructed to prepare the policy or bylaw statement...."

The board did discuss the smoking policy on Nov. 13, but rejected the statement offered at that time. Starting anew tonight, the board will have the opportunity to direct the president to issue a new statement, which would then be up for vote at the next meeting.

The agenda includes brainstorming alternative class times for winter quarter, discussing the professional development calendar, welcoming Affirmative Action Director Donna Albro, and hearing reports from other councils and groups.

Questions? Call Steve Evans at ext. 2453.

COUNTDOWN TO 25TH - Only five more days to wait for KLCC's 25th anniversary celebration in the Hult Center lobby on Monday, Feb. 17, from 5-8 p.m. Refreshments and live music included. Friends and listeners invited.

SCHEIDECKER APPOINTED - Jane Scheidecker, director of the Small Business Development Center, has been appointed to the Riverfront Research Park Commission. The commission makes recommendations to the City of Eugene and the UO on development of the park. Scheidecker also serves on the UO Museum of Natural History Board and is a member of the International Association of Small Business Management Instructors, the Southern Willamette Research Corridor, and the editorial advisory board of Oregon Business magazine.

SIGN UP FOR EDUCATION-EMPLOYER TELECONFERENCE - LCC will host a live interactive teleconference, "High Performance Education: Meeting Employers Needs," on Wednesday, March 4, from 10:30 a.m. to 12:30 p.m., in PE 205, sponsored by the Small Business Development Center. CLASSIFIED COUNCIL REPORT - Proposed personnel classification titles under consideration by the reclassification committee does not reflect a true distribution of classes, Classified Council concurred at its Feb. 12 meeting. Council decided to send a memo to the committee recommending that all job descriptions be reviewed before titles and classes be considered.

Union officers reported that retroactive pay will be paid March 31 and that new insurance benefits will be effective April 1. Union members ratified a tentative contract on Feb. 6 and the Board of Education approved the contract Feb. 12.

Recent committee appointments of classified staff were announced including Ginger Yamamoto to the Tuition Committee and Pam Robinson possibly; and Kitty Seymour, Katie Lytle and Jane Russell to the Budget Review Committee.

The new recycling program was discussed members were advised to contact Pam Summerville at Weyerhaeuser at 688-2124 with questions or requests.

Departments interested in previewing or purchasing any of this equipment before it is publicly bid should contact Bob Cudmore in Purchasing Services at ext. 2208. Note that the equipment is available only for departmental transfer at this time, not purchase for personal ownership.

RECYCLING EXPLAINED - Weyerhaeuser won the bid to do Lane's recycling after Campus Ministry's Jim Dieringer said he could no longer continue the program. Weyerhaeuser barrels for "OFFICE PAPER" and "OTHER PAPER" have been placed around campus. Here's what you can put in them, plus a few tips:

OFFICE PAPER: computer, white, pastel colored paper, bond, typing, copier, index cards, envelopes with or without windows, fax paper, carbonless paper, slick or glossy paper such as brochures and junk mail flyers (but not magazines), manila and bleached file folders, and direct mail.

OTHER PAPER: newspapers and inserts, magazines, catalogs, unbleached paper, packaging papers, cereal boxes, shoe boxes.

CARDBOARD: corrugated cardboard should be flattened and stacked by the barrels.

STAPLES, PAPER CLIPS & POST-IT NOTES: You do not have to remove these.

NOT ACCEPTABLE: Pyvek mailing envelopes that won't tear; full sheets of carbon paper; wrappers from copier paper; and, deeply colored or fluorescent papers like goldenrod (new requirement since the program started a couple of weeks ago).

QUESTIONS: Call Pam Summerville at Weyerhaeuser at 688-2124. Or, write your question and leave it taped to a barrel and the Weyerhaeuser rep will write an answer and leave it for you to read. Or, send your question to Pam Summerville at Weyerhaeuser, Secondary Fiber Division, PO Box 2541, Eugene, OR, 97402.

FACULTY COUNCIL REPORT - Faculty Council heard a proposal to return to a traditional inservice schedule at its Feb. 13 meeting. The proposal calls for eight days of inservice during the two weeks prior to the start of fall term, with two days reserved for optional use on non-scheduled work days with department approval. The proposal was from the faculty professional development team. Council agreed to share the proposal with departments before making a recommendation.

Council brainstormed how to schedule winter term. Winter term is shorter due to the President's Day holiday and the Martin Luther King staff development day, which affect Monday classes, and sometimes due to winter weather closures. Suggestions included finding out exactly how many Monday students are affected, building independent study into the winter curriculum, setting up telephone trees to inform students of their assignments on snow days, and holding finals Tuesday through Friday to allow an extra Monday for instruction (rather than holding finals Monday through Thursday). Council asked LCCEA to poll faculty about winter term scheduling, and suggested that students and other staff also be consulted.

The roles of Faculty Council and LCCEA were put on the agenda for a future meeting. The matter arose when Council decided to support classified staff by not volunteering for the Valley River Open House, an action which some felt should have been left to LCCEA.

Maxine Fraumann reported that the UO is considering going from three-hour to four-hour credit classes. Council decided to send a representative to a Feb. 19 meeting at the UO to find out more.

Donna Albro, new affirmative action director, was introduced. She said she plans to make informational presentations about affirmative action at Lane, offer a spring term course in cultural diversity open to staff, and update Lane's affirmative action plan. She is located in Industrial Tech. Building Room 208, at ext. 2870.

Faculty Council meets again Feb. 27, 3-5 p.m., in the Board Room.

USE VISA TO SAVE MONEY - Purchasing Services encourages staff to utilize department VISAs for every applicable purchase (under \$200 on "21" accounts). Each VISA purchase saves the college the considerable cost of issuing a purchase order. Thanks.

Money was provided when the state legislature allocated funds honoring the college's new tax base. The hangar will be built at Eugene Airport on three acres of rent-free land offered by the City of Eugene.

Later expansion could bring the investment up to \$3 million and include avionics in the airframe and powerplant foundation, and training for ground handlers, cargo personnel, air traffic controllers, and counter agents. When complete, 300 students would be trained, up from the current 85 a year.

Mechanical Technologies Chair Ted Kotsakis says the expansion is propelled by a soaring state and national demand for skilled aerospace labor. For example, over 3,000 aviation technician jobs are expected to be created in the Portland-Eugene area by Pamco, a return-to-service aviation company now building at Portland airport, and by Alaska Airlines, which is thinking about building a return-to-service hangar in Portland. Indirectly related jobs could total 1,500. "The future for aviation technicians has never been brighter," says Kotsakis.

Creating jobs are the production of new, high-tech aircraft, maintenance of older aircraft (the average age of US commercial aircraft now exceeds 12 years), stricter maintenance standards, the aging of the current workforce, and the expectation that the number of air travellers will double by 2005.
