BOND NEWS: A FAREWELL

Memorial trees have been relocated from the site of the soon-to-be-constructed Student Services Building on main campus. Regrettably, the remaining trees will have to be destroyed for a variety of reasons. The contractor, Chambers Construction, set-up in late February or early March, fence off the site, then remove the trees. Now is the time to say farewell. For more information about bond projects, call Mike Hopkinson or Joan Aschim at Ext. 2027, visit the Web at <http://lanecc.edu/campsvcs/ie/default.htm>, or E-mail your question or comment to bond@lanecc.edu.

COMMUNITY PERCEPTION STUDY 1999 CONTINUED: LIKELIHOOD OF TAKING COURSES AT LANE

Fifty-seven (57) percent of those surveyed reported a likelihood of taking a class through Lane in the next three years; 27 percent reported that they would be "very likely" to do so, and 30 percent "somewhat likely" to do so. Those who reported that they would be "very" or "somewhat likely" to take a class through Lane in the next three years were asked if they would take a class at Lane for one of several possible reasons: The most popular reason for taking a class is "for personal interest, a hobby, or self-enrichment" (88 percent); followed by "to perform better in a present career or job" (54 percent); "to train for a new career" (45 percent); "to explore different kinds of jobs or careers" (36 percent); "to earn a two-year associate degree" (32 percent); "to earn college credit for a four-year degree" (32 percent); and "to complete high school or earn a GED" (6 percent). LANE TO CELEBRATE OPENING OF ELMIRA CENTER

Lane Community College will celebrate the opening of its new learning center at Elmira High School on Thursday, March 16 from 5-7 p.m., including a formal dedication at 6 p.m. There will be informational tables, demonstrations, mini-classes, entertainment and refreshments. The center is located at 24936 Fir Grove in Elmira.

Although Lane has offered classes in the area since 1966, the new 3,000-square-foot facility provides comprehensive access to college classes and services for residents of Elmira, Veneta, Noti and Crow. "This is a shared facility for Lane, the high school and the community," says college President Jerry Moskus. "Without the Fern Ridge school district's willingness to build on-site, this wouldn't have happened. The college can use the high school's classrooms and labs, and now they can use our facilities and technology, and the community can access the college."

The center offers a variety of credit and continuing education classes such as telecourses, online courses, and independent and guided learning studies as well as traditional classroom instruction.

Services include college admissions and registration. Internet and E-mail access is available for \$1 per hour or \$36 per term.

Facilities include a computer lab, a large classroom and a small conference room available to community groups. High school students will use the center during college off-hours, and the college will use high school rooms for some evening classes.

The center was built at the same time as a high school capital improvement project. The college and the school district realized significant savings by sharing infrastructure and architectural costs. Lane has opened similar centers at Thurston, Willamette, Oakridge, Churchill, and McKenzie high schools. Construction is underway at Junction City and a minicenter is open at Harrisburg. Voters endorsed the centers as part of Lane's \$42.8 million construction bond. For more information, call the Community Learning Center main office in Eugene at Ext. 2907. Elmira center coordinator Tina Reyes can be reached at 935-4345.

BOND NEWS: STUDENT SERVICES PROJECT WILL CLOSE DRIVEWAY AND SIDEWALK

The next major construction project on Lane's main campus is the Student Services Building. Construction will begin in late February or early March. Chambers Construction of Eugene was awarded the contract for \$3,748,270 at the Jan. 22 Board of Education meeting.

Construction will cause the closure of the west end of the old bus lane that goes from the Apprenticeship Building past the Electronics Annex modulars. The section of the drive to be closed is from the west entrance to the southwest corner of the Business Building. Vehicles which use the drive to reach the Center Building, Forum Building, or other buildings bordering the drive, will need to enter from the east, turn around, and exit the same way. Signage will be installed to regulate back-and-forth traffic on the one-lane road. The closure will take effect sometime in late February.

Pedestrians accessing campus from the west parking lot will need to use the main entrance walkway over the fountain pond, or the Health Tech Building ramps, or the Apprenticeship Building sidewalk. Construction will close the sidewalk, which parallels the south end of the fountain pond.

The new Student Services Building will be two stories with 37,450 square feet of offices, service areas and other rooms. It will house admissions, registration, student records, financial aid, payments, counseling, testing, career and employment services, tutoring, and veterans services. It also will be home to student government, student activities, disability services, substance abuse prevention, and multi-cultural and women's programs. Funding is provided by Lane's \$42.8 million construction bond.

For more information about bond projects, call Mike Hopkinson or Joan Aschim at Ext. 2027, visit the Web at <http://lanecc.edu/campsvcs/ie/default.htm> , or E-mail your questions or comments to bond@lanecc.edu .

COLLEGE COMMITTEE RECORDS PRESERVED IN ARCHIVES

The records of all college committees (standing, ad hoc, advisory, councils, task forces, etc.) are important because they document the activities and administration of the college. Committee records, therefore, have a permanent retention <<<http://lanecc.edu/archive/rddsadm2.htm#College>>> and

should be preserved in the college archives. All staff who chair or facilitate committee meetings, or who are responsible for keeping notes and minutes, should make sure that all committee records, (agendas, minutes, reports, policy statements, etc.) eventually find their way into the Archives at Lane. This is a good time to clean out filing cabinets, and transfer to the Archives the records of inactive committees or old records of active committees. Committees that distribute minutes by E-mail should add the Archives to their E-mail lists. For more information, call Elizabeth Uhlig, Archivist, Ext. 2466, uhlige@lanecc.edu.

RECYCLE YOUR CORRUGATED CARDBOARD

Cardboard collection boxes are located outside of Administration, the Apprenticeship Annex; the south side of the Center Building; Health and Physical Education; on the first floor of Campus Services; and inside the Science Building. Small amounts of flattened cardboard may also be placed behind paper collection containers if the collection boxes are too far away. Thin cardboard, such as the kind from which cereal boxes are made, can be placed in the blue mixed paper recycling barrels. Help alleviate budget-cut pains by recycling. Lane sells its recycled cardboard for \$25 per ton, but must pay about \$80 per ton to dispose of garbage. If you have questions, would like to request a recycling pick up, or notice an overflowing collection container, call Recycling Services, Ext. 2714.

If you don't have an answering machine, make sure you know when the appropriate phone is ringing, and answer it as you would any other phone in your department. If we call and get no answer, you will have two more opportunities during the month of February to catch the call. Think of the call as a "mystery shopper" looking for information about your department. Results of this testing will be forwarded to the responsible manager. If you'd like additional training, or a refresher course in use of this technology, call Ext. 2059, and we'd be happy to set-up a time that works for you.

WEATHER DELAY POLICY AMENDED

The following is a clarification from administration regarding what to do in the event of a weather delay: If the opening of classes is delayed, students and faculty should report to the class or lab they would normally have been attending at the new starting time, provided at least one hour of class/lab time remains. For example, if opening is delayed to 10 o'clock, classes and labs normally in session at 10 o'clock would meet, but only if the normal ending time for that class or lab is 11 o'clock or later. The remainder of the day would continue on the regular schedule. For more information, contact Joan Aschim, Institutional Advancement, Ext. 2591.

LANE ARTIST DISPLAYS PAINTINGS IN FLORENCE, ITALY

Jerry Ross, Computer Information Technology instructor, is also known for his painting. He will have an opening at the famed cafe "Il Cabiria" in Florence, Italy--not to be confused with Florence, Ore., although that too has its charm, he says. The one-man show went up Jan. 28, and will continue until mid-February. The opening is Friday, Feb. 4, should any readers have a StarTrek teleport machine handy.

Il Cabiria is in one of Firenze's most beautiful piazzas; the Piazza Santo Spirito was designed by Brunelleschi, who also designed the famous Cupola of Florence. If you sit at the Cafe Il Cabiria, you are right in front of Brunelleschi's Church of San Spirito (1482).

This summer, Jerry will have another one-man show in the small mountain town of Loiano, Italy, sponsored by the municipal government. The show will be in the Sala Mostre del Municipio, June 17 through July 2. It was in this area that Jerry met soldiers from the 361st and 91st Infantry Divisions who fought there during World War II. This event offers Lane staff another excuse to travel to northern Italy over the summer. The opening reception will be 17 giugno ore 17 (June 17 at 5 p.m.). Jerry will provide a list of local hotels in Loiano and surrounding towns. He's also participating in an international online show in Scotland. For information of any of these events, please see: <http://www.newzone.org/Jerry/jrossi.html> ; for the Loiano show see: <http://www.newzone.org/Jerry/loiano.html> .

BOND NEWS: MAIN CAMPUS PROJECT UPDATE

SCIENCE/MATH. Science staff felt a shudder last Thursday when a cement truck backed under a protruding lateral concrete beam and got stuck. The truck was able to pull clear and the beam is being inspected for structural integrity. Facilities manager Mike Ruiz called it an informal seismic test. (Seismic upgrades are planned for this and other remodels.) This week's activities include some underslab braising by the plumbers, and plans are being made for asbestos removal. Asbestos is present in exterior transite board and in the mastic which holds ceiling tiles in place, both of which will be disturbed by construction.

CHILD CARE. Walls for Building 4 (ASLCC Child Care Co-op) should arrive this week. Building 3 (Preschool) has most roof trusses in place, Building 2 (Infant/Toddler program) has windows and doorframes installed, and Building 1 (Early Childhood Education and Lane Family Connections offices) has a nearly-complete roof, interior drywall, and exterior primer.

CAMPUS SERVICES. Interior plumbing, electrical and heating/air conditioning work is proceeding well and college staff are impressed with the quality of the contractors' work. Roofing should begin this week. Plumbing is being scheduled for the laundry. Temporary paving is being considered for the northside driveway. The driveway has been damaged by construction and separate work by US West to install an adjacent cell phone tower.

WELDING. While various construction details remain incomplete, Facilities staff have been able to install some welding booths and other program equipment. The general contractor says he will be finished in mid-February. Classes should be held in the new building spring term 2000.

STUDENT SERVICES. Construction mobilization should begin about the first of March. This will close the west end of the access road by Apprenticeship, and the south end of Parnell Loop. Traffic to Center and Forum Buildings will be directed to enter and exit from the east. Traffic will be regulated by signage and a pull-out space will be prepared.

FOR MORE INFORMATION, e-mail bond@lanecc.edu, or call Mike Hopkinson or Joan Aschim at Ext. 2027, or visit the Web at <http://lanecc.edu/campsvcs/ie/default.htm>.

LEADERSHIP TRAINING: OREGON INSTITUTE NOW ACCEPTING APPLICATIONS

The ninth annual Oregon Institute for Leadership Development will be held at the Silver Falls Conference Center, June 19-22. Similar to past years, the state chapter of AAWCC is asking that each college make its participant selection.

OILD is modeled after the National Institute for Leadership Development (NILD), a professional development program for women in higher education. The Oregon version is an in-service opportunity for community college women interested in leadership and personal and professional growth. OILD is supported by Oregon community college presidents and costs for the institute, including training, food, and lodging are paid by your college (scholarships are also available).

Session topics include: Becoming a leader at any level; Teambuilding; Understanding your work communication style; personal power; mentoring and strengthening your support network; problem solving; surviving organizational politics; stress reduction and balancing priorities; moving up; feeling stuck; and a panel of Oregon leaders.

If you are interested in being a participant at OILD, obtain and complete an application form, available from Miriam Jordan, Office of Instruction and Student Services, Ext. 2315. OREGON INSTITUTE NOW ACCEPTING APPLICATIONS FOR LEADERSHIP TRAINING

The ninth annual Oregon Institute for Leadership Development will be held at the Silver Falls Conference Center, June 19-22. Similar to past years, the state chapter of AAWCC is asking that each college make its participant selection. OILD is modeled after the National Institute for Leadership Development (NILD), a professional development program for women in higher education. The Oregon version is an in-service opportunity for community college women interested in leadership, and personal and professional growth. OILD is supported by Oregon community college presidents, and costs for the institute, including training, food, and lodging, are paid by the college. Scholarships are also available.

Session topics include: becoming a leader at any level; teambuilding; understanding your work communication style; personal power; mentoring and strengthening your support network; problem solving; surviving organizational politics; stress reduction and balancing priorities; moving up; feeling stuck; and a panel of Oregon leaders.

If you are interested in being a participant at OILD, obtain and complete an application form, which is available by contacting Miriam Jordan, Office of Instruction and Student Services, Ext. 2315. The deadline for applications is Friday, March 3. A committee, selected by the AAWCC board, reviews all application forms and makes a selection of one participant and one alternate. TIME TO REGISTER FOR ANNUAL CONFERENCE ON FAMILIES

Register now for Lane's Seventh Annual Conference on Families, which takes place on Saturday, March 4. Nationally recognized educator H. Stephen Glenn, author of "Raising Self-Reliant Children in a Self-Indulgent World," will give a full-day presentation on "Making a Positive Difference With Young People." Parents, staff, instructors and other professionals who want to their increase effectiveness and play an influential role in the development of children and youth will find Glenn's wit and wisdom engaging and practical. In addition to providing decades of training for others, Glenn is the father of four and the foster parent of twenty children.

Glenn's approach centers on helping adults increase their autonomy-oriented behaviors and decrease their control-oriented behaviors. Adults will learn ways to increase positive behaviors when working with youth, and to minimize negative behaviors; to use communication skills that reflect appreciation, optimism and respect; and to model an integration of actions and values that allows young people to be more willing to learn from adults.

A flyer describing the workshop is available at Students First!, or by calling Carol Lynn Morse, Continuing Ed./Counseling, Ext. 2234. Lane Continuing Education or credit transcripts will document participation. The conference is approved for the National Board of Certified Counselors (NBCC) continuing education credit.

FROM THE GROUNDS UP

A report on weeds from groundskeeper Frank Drengacz: I don't dislike weeds as long as they don't grow where I don't want them. But of course, it doesn't work that way. I have realized that either you plant something, or nature will. I experimented with a wildflower bed last year, and was pleased with how it performed. They gave color all season long. The wildflowers out-competed the weeds. As a bonus, I discovered that the flowers reseeded quite readily. I'm going to expand this weed control program again this year. I'll be using other blends, and seeding more areas! After seeding, I'll report the locations of the beds and the blend used. This way you can all help me determine the best blends.

I missed two memorial plants by Apprenticeship. We will be moving the azalea and the beech tree. The beech will move to the memorial grove west of Science. The azalea will go into a pot for now. Go, Titans!

Parents, staff, instructors and other professionals who want to increase their effectiveness and play an influential role in the development of children and youth will find Glenn's wit and wisdom engaging and practical. In addition to providing decades of training for others, Glenn is the father of four and the foster parent of twenty children. Glenn's approach centers on helping adults increase their autonomy-oriented behaviors and decrease their control-oriented behaviors. Adults will learn ways to

increase positive behaviors when working with youth, and to minimize negative behaviors; to use communication skills that reflect appreciation, optimism and respect; and to model an integration of actions and values that allows young people to be more willing to learn from adults. A flyer describing the workshop is available at Students First!, or by calling Carol Lynn Morse, Continuing Ed./Counseling, Ext. 2234. Lane Continuing Education or credit transcripts will document participation. The conference is approved for the National Board of Certified Counselors (NBCC) continuing education credit.

BOND UPDATE

COLLEGE TRADESPEOPLE continue to save the college money with their quality performance, initiative and creativity. Most recently, painters Steve Wickwire and Don Migliozi obtained special training to apply fire-proofing paint in the Welding Technology Building, saving the college half of what it would cost to have the contractor do the work.

COMFORT LEVELS will be more pressed as construction shifts into higher gear with the Student Services Building and other projects. The bond office is working with Personnel and meeting with folks who will be closest to construction sites to identify and minimize health and comfort issues as much as possible.

WELDING BUILDING code problems have been resolved in principle, and an occupancy permit is expected soon. Lane tradespeople are installing some owner-supplied items in the meantime. Fireproofing painting should take about two weeks. Welding and jewelry programs should be operational in the new building by the start of spring term.

THE CHILD CARE complex continues to grow. Walls are up on Building 4, and roof trusses should arrive this week. Roof trusses are set on Building 3, and roofing is in progress on Building 2. Building 1 has a finished roof and exterior doors and windows; gypsum board has been installed indoors. Lane Family Connections is scheduled to be the first occupant. They will move in around the first of May.

CAMPUS SERVICES ADDITION masonry is complete, glu-lam floor and roof beams have been set; floor joists and roof trusses are installed; and sheathing has been placed. Completion is set for late April.

SCIENCE/MATH BUILDING foundations are more than half poured. Some retaining walls will be poured soon. Some plumbing work is being done under the existing building. Plumbers are working from 5 to 8 a.m. to minimize disruption to classes. The project is now about five weeks behind schedule due to delays caused by the structural engineers.

A STUDENT SERVICES BUILDING pre-construction orientation meeting is set for Wednesday, Feb. 16. On-site construction mobilization is expected by early March.

THE WORKFORCE TRAINING CENTER bid has been rescheduled to June.

THE HEALTH TECH remodel should bid in April, and construction should begin mid-June.

SEWAGE LAGOON UPGRADE discussions with engineers, college staff and the Oregon National Guard point to tertiary treatment as the minimum upgrade necessary. An outfall line to the coast fork of the Willamette is being considered. The college and ONG are discussing an interagency agreement to cover upgrade costs. ONG wants to use the lagoons for a facility it plans to build across 30th Avenue. The facility would include classrooms, a large hall, parking and other amenities which Lane could use. ONG is considering a skybridge, tunnel, or shuttle to cross 30th.

A NEW LTD BUS STATION is being designed. The current shelters are temporary. Construction of the permanent station is scheduled for this summer.

ELSEWHERE, the Junction City learning center has exterior walls, roof trusses and interior framing, and is a little ahead of schedule. The Elmira center will open March 16. A breezeway for the Florence Center addition should be constructed soon and completed in early April.

FOR MORE INFORMATION, E-mail bond@lanecc.edu , or call Mike Hopkinson or Joan Aschim at Ext. 2027, or visit the Web at <http://lanecc.edu/campsvcs/ie/default.htm> .

FMP BUILDS EQUIPMENT SHED, GRINDER SHELTER

Have you noticed the new metal-covered building beside the sand volleyball courts? It's an equipment shed built to protect tractors, mowers and other items previously parked outdoors. "This will extend the life of the equipment and help us stretch the budget," says Facilities Management and Planning Superintendent Mike Ruiz. The shed includes a dedicated space for emergency response equipment ranging from flashlights to generators.

Construction Technology students framed most of the shed last fall, and FMP staff continue work as they have time. College architect Tom Oroyan designed the building.

FMP also is building a shelter for the Cookie Monster, the brand name of a comminutor, or sewage grinder, installed in a channel beside the sewage lagoons. The college recently replaced the old grinder with a new one. The shelter will extend equipment life and improve working conditions for maintenance crews. The Facilities Management Committee approved capital repair and equipment funding for both projects. They are not funded by the bond. For more information, contact Mike Ruiz at Ext. 2566.

COLLEGE COUNCIL REPORT

The discussion that captivated College Council on Feb. 15 wasn't even on the agenda. It began with the topic of charters, or guidelines for work groups. The Board of Education has directed administration to draft language for a policy encouraging the use of charters. This led to a discussion of another board directive, for a decision appeals process. The prospect of an appeals process raised several questions, concerns and speculations. There was wide support for the point that if you had a good shared decision making process and good communications in the first place, you would rarely need an appeals process. Councilors explored current barriers to decision making and communications, such as increased workloads; multiple competing priorities; a cultural reluctance to refuse work; a cultural reluctance to confront decision makers; and the lack of accountability, technology, and others. For example, one person described the difficulty of balancing a production-intensive job with the time it takes to attend meetings or keep up with e-mails, which provide information necessary to making good decisions. Others recalled how the grade-change policy process was sidetracked, unavoidably, by Y2K preparations. No one arrived at any tangible solutions but felt that the discussion should be continued.

In other business, council approved the proposed wording of the policy on charters; advised the president on changing the language of Executive Limitations from negatives to positives; and reviewed an early draft of the March 8 board agenda. Council's next meeting is set for March 7.

BOARD REPORT

The proposal to build a longhouse received the most attention at the Feb. 9 Board of Education meeting. Several speakers from the audience advocated for the project. Native American Student Association coordinator Frank Merrill reviewed the project's history since 1993. Although there is no bond funding for the project, bond manager and architect Bob Mention provided professional advice on what it would take to proceed. Long discussion wrapped up with a unanimously approved motion directing staff to do a site plan including cost estimates for building and maintaining the facility, and stating board approval of the project concept.

In other action, the board extended support for the bus pass program for one year, accompanied by a directive to staff to negotiate a better deal with LTD. The consent agenda was approved including accepting the retirement of Sharon Thomas from English effective June 30; and rejecting bids for new lathes and milling machines for Mechanical Technologies. The board supported the harassment policy on race/ethnicity or national origin, which will be completed and then communicated to the college community.

During monitoring report reviews, the board said administration was doing a great job of providing information and communications, but consensus was not reached on whether the board should have sole power to name a presidential successor in the event of emergency. Discussion will continue with a first reading of a draft policy in March.

Postponed to March were discussions on a resolution calling for affordable education, and a construction labor agreement.

The next board meeting is set for March 8. Board minutes and other board information are posted on the web at <http://www.lanec.edu/presoffc/board/lccboard.htm>.

A teleconference, "Emerging Issues in Accreditation: Moving Toward a Culture of Evidence," will be held Thursday, Feb. 24, from 11 a.m. to 1 p.m. in Center 12. It's free. In the world of accreditation, traditional rules and criteria are changing rapidly. Five major topics will be discussed during this live event produced by Palomar College.

- * What are the causes of dissatisfaction with the current accreditation model?
- * What are the implications of the movement toward competencybased education, and how will traditional models of accreditation deal with it?
- * How will the growing emphasis on assessment and the "culture of evidence" impact traditional paradigms in higher education?
- * How will accreditation policies and practices deal with the growth of mediated instruction and distance education?
- * Is there a future for alternative accreditation systems, such as the Baldridge Criteria or Quality Assurance System Audits?

The final program segment will help institutions develop a "local game plan" for their next accreditation cycle. This teleconference will be video taped and will be available for two-day check out from the library a couple of days after the event. For more information, contact: Cynde Leathers, Ext. 2260.

BOND UPDATE: STUDENT SERVICES PROJECT WILL CLOSE DRIVEWAYS, SIDEWALK

The driveway in front of the west entrance fountain known as Dale Parnell Loop will be closed to vehicles when construction of the Student Services Building begins on Feb. 28. Vehicle traffic will be restricted to parking lot drive-through aisles. A new drop-off area will be designated for Child Development Center clients at the north end of the closure.

The south half of the Loop will be enclosed by construction fencing but pedestrians will still have access to the main entrance sidewalk over the fountain pond, as well as Health Tech Building ramps and sidewalks. The sidewalk to the south side of the fountain pond will be closed. The contractor currently plans to set up either job trailers or store materials on the enclosed part of the Dale Parnell Loop.

Construction also will close the west end of the old bus lane by Apprenticeship, to the southwest corner of the Business Building. Vehicles will still be able to access the Center Building, Forum Building, and other buildings along the lane, by entering and exiting from the east end. Signage will be installed to

regulate back-and-forth traffic in the one-lane road. Chambers Construction was awarded the Student Services Building construction contract for \$3,748,270 at the Jan. 22 Board of Education meeting.

DEQ HEARING ON SEWAGE LAGOONS TO BE HELD

The Oregon Department of Environmental Quality will conduct a public hearing on Lane's Mutual Agreement and Order to upgrade main campus sewage lagoons, on Wednesday, Feb. 23, at 5 p.m. in the Boardroom. The upgrade is needed to handle increased waste volume since the lagoons were built. The hearing was requested by some neighbors across 30th Avenue. Such hearings are routinely offered and conducted by DEQ. For more information, call Mike Ruiz, Facilities Management, Ext. 2566.

TELECONFERENCE ON ACCREDITATION

A teleconference, "Emerging Issues in Accreditation: Moving Toward a Culture of Evidence," will be held Thursday, Feb. 24, from 11 a.m. to 1 p.m. in Center 12. It's free. In the world of accreditation, traditional rules and criteria are changing rapidly. Five major topics will be discussed during this live event produced by Palomar College.

- * What are the causes of dissatisfaction with the current accreditation model?
- * What are the implications of the movement toward competency-based education, and how will traditional models of accreditation deal with it?
- * How will the growing emphasis on assessment and the "culture of evidence" impact traditional paradigms in higher education?
- * How will accreditation policies and practices deal with the growth of mediated instruction and distance education?
- * Is there a future for alternative accreditation systems, such as the Baldrige Criteria or Quality Assurance System Audits?

The final program segment will help institutions develop a "local game plan" for their next accreditation cycle. This teleconference will be video taped and will be available for two-day check out from the library a couple of days after the event. For more information, contact: Cynde Leathers, Ext. 2260.

LEADERSHIP TRAINING: OREGON INSTITUTE NOW ACCEPTING APPLICATIONS

The ninth annual Oregon Institute for Leadership Development will be held at the Silver Falls Conference Center, June 19 to 22. Similar to past years, the state chapter of AAWCC is asking that each college make its participant selection. OILD is modeled after the National Institute for Leadership

OILD is supported by Oregon community college presidents and costs for the institute, including training, food, and lodging, are paid by the colleges. Scholarships are also available. Session topics include: becoming a leader at any level; teambuilding; understanding your work communication style; personal power; mentoring and strengthening your support network; problem solving; surviving organizational politics; stress reduction and balancing priorities; moving up; feeling stuck; and a panel of Oregon leaders. If you are interested in being a participant at OILD, obtain and complete an application form, available from Miriam Jordan, Office of Instruction and Student Services, Ext. 2315. The deadline to submit your application is Friday, March 3. A committee (selected by the AAWCC board) reviews all application forms and makes a selection of one participant and one alternate. Applicants are notified of the outcome. The participant and/or alternate will receive confirmation from Oregon AAWCC through the mail by May 6.

BOND PROJECT UPDATE

STUDENT SERVICES. Chambers Construction says it will set-up on Monday, Feb. 28, for the Student Services Building Project. This is when road and sidewalk closures will take effect. The driveway in front of the west entrance fountain known as Dale Parnell Loop will be closed to vehicles, which will be restricted to parking lot drive-through aisles. The south half of the loop will be enclosed by construction fencing but pedestrians will still have access to the main entrance sidewalk over the fountain pond, as well as Health Tech Building ramps and sidewalks. The sidewalk to the south side of the fountain pond will be closed. Also closed will be the west end of the old bus lane by Apprenticeship, from its west end to the southwest corner of the Business Building. Vehicles will still be able to access the Center Building, Forum Building, and other buildings along the lane, by entering and exiting from the east end.

CHILD CARE. Building 1 interior walls are being primed for texture. Building 2 interior mechanical equipment is being installed; roofing, siding and windows are installed; insulation is being installed. Building 3 plywood roof sheeting is being installed. Building 4 walls are set and roof trusses are being installed. Sidewalks for Buildings 1 through 3 are being set-up for pouring.

SCIENCE/MATH. Asbestos abatement work is planned for finals week. Exterior work will occur during the day but is expected to involve only hand tools, no power equipment. Interior work will be done from 10 p.m. to 6 a.m. The material to be removed is non-friable and should cause no air quality disturbance. Asbestos materials must be removed before X-raying for seismic upgrading can be done. Similar asbestos abatement work will occur on all remodel projects. In other work, various footing, concrete pouring, and plumbing work continues. The project is still about five weeks behind schedule due to structural design work problems.

CAMPUS SERVICES ADDITION. Power will be connected this Friday. The storage shed has received permit approval. Roofing is being installed and electrical, mechanical and plumbing work continues indoors. The project is on schedule with substantial completion expected in late April.

WELDING. Welding and jewelry programs are expected to conduct major moving during the term break, and to offer classes in the new building effective spring term. Fireproofing painting will begin next week and take about two weeks to complete. A "punchlist" walk-through by the college, contractor, architects and others, should occur this week.

FOR MORE INFORMATION, contact Mike Hopkinson or Joan Aschim at. Ext. 2027, or E-mail bond@lanec.edu .

BOND NEWS: A BID BELOW BUDGET DOESN'T MEAN MONEY'S LEFT OVER

When a construction bid comes in under the target budget, it doesn't necessarily mean there's money left over to reinstate building features originally cut to meet the target. Consider the recent bid for the Student Services Building, for example. The successful bid was \$3,748,270, and the board-approved "target" budget was \$3,944,842. It's tempting to assume there was \$196,572 left over, but there wasn't. The reasons why illustrate the complexity of funding major construction projects.

First of all, after the target of \$3,944,842 was established, \$210,420 was added to make sure the building met ADA requirements, and then another \$17,154 was added as an energy management incentive, bringing the total target to \$4,172,416. Prior to going out for construction bids, the bond project manager identified \$361,940 in labor and materials that could be performed, or purchased by the college. These "owner-supplied" items were therefore excluded from the contract document on which contractors bid. Since the owner-supplied items would be paid by the bond, the \$361,940 had to be subtracted from the total target, leaving \$3,810,476 as the conceptual target by which contract bidding would be gauged (whether the bids were "high" or "low" relative to the target). The successful low bid was \$3,748,270, only \$62,206 less than the conceptual target, and much less than the \$196,572 which appeared to be "left over," if you didn't know all the details. The \$62,206 is not available to add back features for three reasons. First, the money needs to be available to cover any unanticipated construction expenses during the project.

An example of such an expense on another project is the more-extensive-than-predicted rock removal for the Science Building site preparation. Second, the money needs to be available for any "change orders" that occur during construction. An example of a change order, again from another project, was when a parking lot had to be re-excavated to create a stronger base for parking at the Welding Building. Third, the Facilities Management Committee has adopted the position that when a project goes out to bid, it has been determined that the project meets the minimum requirements of the organization(s) and users involved. Minimum requirements cannot change for purposes of construction after a project bids. FMC decided that any money left after construction, unanticipated expenses, and

change orders, will be returned to the bond general contingency account. The FMC then allocates this fund as it deems appropriate. The Bond Project Management Team hopes this helps explain how bond funds are allocated, and why money isn't necessarily available to add back features when a bid comes in under the target budget. If you have further questions, please contact Bond Project Manager Bob Mention, at Ext. 2747.

LEADERSHIP TRAINING: OREGON INSTITUTE NOW ACCEPTING APPLICATIONS

The ninth annual Oregon Institute for Leadership Development will be held at the Silver Falls Conference Center, June 19 to 22. Similar to past years, the state chapter of AAWCC is asking that each college make its participant selection. OILD is modeled after the National Institute for Leadership Development (NILD), a professional development program for women in higher education. The Oregon version is an in-service opportunity for community college women interested in leadership and personal and professional growth. OILD is supported by Oregon community college presidents and costs for the institute, including training, food, and lodging, are paid by the colleges. Scholarships are also available. Session topics include: becoming a leader at any level; teambuilding; understanding your work communication style; personal power; mentoring and strengthening your support network; problem solving; surviving organizational politics; stress reduction and balancing priorities; moving up; feeling stuck; and a panel of Oregon leaders. If you are interested in being a participant at OILD, obtain and complete an application form, available from Miriam Jordan, Office of Instruction and Student Services, Ext. 2315. The deadline to submit your application is Friday, March 3. A committee (selected by the AAWCC board) reviews all application forms and makes a selection of one participant and one alternate. Applicants are notified of the outcome. The participant and/or alternate will receive confirmation from Oregon AAWCC through the mail by May 6.
