STUDIO ASSISTANTS SHOW FEATURES CLAY AND SCULPTURAL ART WORK

The Art Department Gallery presents "Material Realizations" featuring clay and sculptural artwork by LCC studio assistants Tim Ditter and Kit Winter Kerkvliet, April 3 through 20 in the gallery, Building 11. An artists' lecture will be held in the gallery on Thursday, April 6, at 4:30 p.m. followed by a reception.

Ditter describes his work as the crossroads where his various interests in philosophical Taoism and traditional Chinese medicine can meet his background in carpentry as well as his fascination with architectural design. Ditter loves the immediacy of clay and the limitless directions from which it can be pursued.

Winter Kerkvliet works in multimedia sculpture. His work is an exploration of material technique and concept. Kerkvliet says the properties of substance resonate with his voice as he creates. Ideas and composition are at the core of each of his pieces. This varied showing of work reflects Kerkvliet's diverse ventures since coming to sculpture as a form of expression.

LANE EVENTS ONLINE: www.lanecc.edu/today.html

NEWS**EARLY WARNING AND INTERVENTION SYSTEMS**

Early warning and intervention systems identify students who are having academic or personal problems before they begin to fail and respond with customized plans for addressing each student's unique needs. There are two important goals of an early alert and intervention system. First, in advance of their enrollment, a goal is to identify high-risk or dropout-prone students who could benefit from assistance. Second, a goal is to identify enrolled students as they begin to experience academic or personal problems that may be reduced through services provided by the college.

Some critical components to an effective early alert and intervention system include: utilization of placement test scores, assessment of academic risk factors, assessment of social and psychological risk factors, tracking GPA, tracking course completion rates, tracking attendance, and tracking mid-term grades. Once students having problems are identified, they can be referred to appropriate services before they fail.

We encourage instructors to find a time to talk to their students about academic support resources available to students including tutor central, the Math and Science resource centers, and the Advising/Counseling Center. For more information, check out the SAGA webpage at <http://www.lanecc.edu/saga/> or contact Dan Timberlake, Director of Counseling, at ext. 5321 or timberlaked@lanecc.edu.

The Dan Moriarty Community Partner Award will be awarded to Food for Lane County this Saturday, April 8 at the first annual statewide Oregon Campus Compact Civic Engagement Awards ceremony in Portland. Lane's service learning and community-based partnership with Food for Lane County has developed significantly over the past several years, and as a result, Food for Lane County will be recognized for demonstrating a sustained commitment to educating students for lifelong citizenship. Students from Lane have served during numerous FFLC events and food drives, including Chefs' Night Out and Whiteaker Thanksgiving dinner, as well as at several Food for Lane County sites including Grassroots, Youth Farm, and Churchill Community Gardens. Food For Lane County will also receive a \$200 monetary donation from Oregon Campus Compact in recognition for its involvement in community-based learning. LEARNING COMMUNITIES OFFERS CURRICULUM DEVELOPMENT OPPORTUNITY

For the past two years, Lane faculty and staff have been developing a First-Year Experience program for new credit students. First-Year Experiences provide a welcoming and supportive academic and social climate by combining learning communities with advising, mentoring and other support services. First-Year Experiences are one of the six best practices for success and retention.

This year, the goal of the Learning Communities Leadership Team is to offer learning communities options to first-year students for a full academic year in 2006-07. To develop this program, we are providing curriculum development support for Winter Term 2007 learning communities that fulfill freshman-level AA/OT and other degree requirements. (This would complete the structure of the first year.)

We invite applications from faculty who are interested in developing a first-year learning community for Winter 2007. We want to encourage first-year students to fulfill their requirements in General Education, Distribution Areas and/or the Ethnic, Gender and Cultural Diversity early on in their program. Toward that end, we will support a design that links a Winter 2007 Writing 121 class with a freshman-level course (i.e., one that has no college prerequisites) from the list below (taken from the College Catalog Degree requirements, page 41):

- Ethnic, Gender, Cultural Diversity courses
- Mathematics
- Health
- Oral Communication/Rhetoric
- Arts and Letters
- Social Science
- Science/Math/Computer Science

If you would like to apply, send an e-mail to Judy McKenzie, Interim Learning Communities Coordinator, by April 18 with the following information:

- Names of faculty who will teach the linked courses in Winter 2007
- Courses you plan to link (e.g., Writing 121 + XX)
- Degree requirements courses fulfill (e.g., Gen. Ed./Ethnic, Gender and Cultural Diversity)
- Two or three sentences describing how you plan to connect the curriculum

If your initial application is approved, the Learning Communities Leadership Team will work with you on the design and planning. For more information, contact Judy McKenzie at ext 3657 or mckenziej@lanecc.edu.

EARLY WARNING AND INTERVENTION SYSTEMS

Early warning and intervention systems identify students who are having academic or personal problems before they begin to fail and respond with customized plans for addressing each student's unique needs. There are two important goals of an early alert and intervention system. First, in advance of their enrollment, a goal is to identify high-risk or dropout-prone students who could benefit from assistance. Second, a goal is to identify enrolled students as they begin to experience academic or personal problems that may be reduced through services provided by the college.

Some critical components to an effective early alert and intervention system include: utilization of placement test scores, assessment of academic risk factors, assessment of social and psychological risk factors, tracking GPA, tracking course completion rates, tracking attendance, and tracking mid-term grades. Once students having problems are identified, they can be referred to appropriate services before they fail.

We encourage instructors to find a time to talk to their students about academic support resources available to students including tutor central, the Math and Science resource centers, and the Advising/Counseling Center. For more information, check out the SAGA webpage at <http://www/lanecc.dedu/saga/> or contact Dan Timberlake, Director of Counseling, at ext. 5321 or timberlaked@lanecc.edu

NEWS

SUPPLEMENTAL INSTRUCTION IS A BEST PRACTICE

Supplemental Instruction (SI): A Best Practice for Student Success brought to you by SAGA (Success and Goal Attainment committee): This week's featured best practice is Supplemental Instruction (SI)*, which links targeted, high-risk courses to an academic assistance program that utilizes regularly scheduled instructor, peer, or tutor-led study sessions or discussion groups. The purpose of SI is to improve success and retention, thus reducing attrition in historically difficult or gatekeeper classes. The SI leaders may attend the targeted courses, and then work with students in smaller groups to integrate the course content and to develop learning strategies.

A new subcommittee of SAGA is working to implement Supplemental Instruction systemically at Lane. Although there is not yet a collegewide SI program, there are services in place that reflect parts of this model: content specific study skills, charlas and visitas (interactive labs in Spanish and French), pilot projects in the culinary and music programs, informal study groups in science and CIT, and the women's transition to success programs required discussion groups. In addition, the SI committee has received funding through the Strategic Learning Initiative (SLI) to develop two pilot projects this term. For more information, or if you'd like to join the Supplemental Instruction committee, contact Adrienne Mews at 5871 or mewsa@lanecc.edu

*SI, which is a proven strategy for improving course retention and student success, was created at the University of Missouri-Kansas City (UMKC) in 1973. This practice has been named an Exemplary Educational Program by the U.S. Department of Education. UMKC continues to use supplemental instruction in many of its gatekeeper courses, and faculty and staff from hundreds of institutions around the world have implemented their own SI programs.

LEARNING COMMUNITIES OFFER CURRICULUM DEVELOPMENT FUNDS

For the past two years, Lane faculty and staff have been developing a First Year Experience program for new credit students. First year experiences provide a welcoming and supportive academic and social climate by combining Learning Communities with advising, mentoring and other support services. First year experiences are one of the six best practices for success and retention. This year, the goal of the Learning Communities Leadership Team is to offer learning communities options to first-year students for a full academic year in 2006-07. To develop this program, we are providing curriculum development support for winter term 2007 Learning Communities that fulfill freshman-level AAOT and other degree requirements. (This would complete the structure of the first year.)

We invite applications from faculty who are interested in developing a first year Learning Community for winter 2007. We want to encourage first-year students to fulfill their requirements in general education, distribution areas and/or the ethnic, gender and cultural diversity early on in their program. Toward that end, we will support a design that links a winter 2007 Writing 121 class with a freshman-level course (i.e., one that has no college prerequisites) from the list below (taken from the college catalog degree requirements page 41 ff): ethnic, gender, cultural diversity courses; mathematics; health; oral communication/rhetoric; arts and letters; social science; science, math and computer science.

If you would like to apply, send an e-mail to Judy McKenzie, interim learning communities coordinator, by April 18 with the following information: Names of faculty who will teach the linked courses in winter 2007; courses you plan to link (e.g., Writing 121 + XX); degree requirements courses fulfill (e.g., "gen. ed./ethnic, gender and cultural diversity"); and two or three sentences describing how you plan to connect the curriculum. If your initial application is approved, the Learning Communities Leadership Team will work with you on the design and planning.

The Counseling Department is recruiting students to apply for SSA positions for 2006/07. SERVICE LEARNING CALL FOR PROPOSALS

I am participating in the Day of Silence, a national youth movement protesting the silence faced by lesbian, gay, bisexual and transgender people and their allies in schools. My deliberate silence echoes that silence, which is caused by harassment, prejudice, and discrimination. I believe that ending the silence is the first step toward fighting these injustices. INVESTIGATE THE BODY

Art work and student writing titled, "Investigating the Body," is on exhibit through the first week in May in the Performance Hall (Building 6) lobby. This project is part of the Learning Community, Investigating the Body: Movement, Image and Text, taught by Margaret Bayless (writing), JS Bird (drawing), Bonnie Simoa (movement) and guest artist Barbara Mindell. The primary goal of this learning community was to use the diverse disciplines of dance, art and writing to help students excavate creativity, and to connect creativity with identity and personal voice. Through this process students connected more deeply with who they are, and explored that understanding in artwork, writing and movement. This learning community and exhibition was created with the help of the Strategic Learning Initiative, the Jane King fund, and the Reading Together project. Contact: Myrna Seifert.

Several departments have generously offered benefits to people who become members, including discounts at the Bookstore, student rates for performances and fitness testing, and Counseling will host career-related workshops. Individual memberships are \$25, those who graduated in the last four years receive a discounted rate of \$15, and new graduates will receive one-year of free membership. A membership recruitment mailing will be sent in early May, and a follow-up phonathon will be held in mid-May. Contact: Kathy Thomas.

BOARD REPORT FOR APRIL

Budget proposals for 2006/07 were presented to the Board of Education at its April 12 meeting (see <http://www.lanecc.edu/budget/0607/index.htm>). President Mary Spilde said the proposal process had been excruciatingly painful and emphasized that "behind every reduction is a face." Proposals go to the Budget Committee next (see meeting schedule under EVENTS heading below).

In statements, student Sandin Riddle advocated for a longhouse fee, and student Happy Mathews advocated for an ASLCC fee, both for the student ballot in May.

In action, the board approved the student fee ballot requests; awarded a contract for marketing services to Funk/Levis Associates; and approved its policy on expanded options.

In reviews, the board considered ballot language for the local option levy in November and agreed to state a total dollar amount of \$1.37 million rather than a rate, and to ask for a five-year term. They also reviewed a benchmark report on employees by color as a percent of all employees, and held a first-reading review of board policy on conflict of interest. The next regularly scheduled meeting is May 10. Submitted by Joan Aschim.

NEWS

WASTE AUDIT RESULTS

On Thursday, April 20 Lane Recycling and six volunteers from Lane County Master Recyclers and OSPIRG sorted about 500 pounds of the college's trash that was headed to the landfill. The breakdown included: paper 10.8 percent, glass 4.18 percent, metal 4.42 percent, plastic 5.42 percent, food waste (postconsumer) 28.75 percent, paper towels and napkins 11.55 percent, disposable paper cups 10.07 percent, disposable plates and utensils 4.67 percent, clear plastic bags and wrap 5.41 percent. Actual waste was 14.74 percent. What does this tell us? That a lot of the trash we send to the landfill is avoidable, like paper cups (bring your own!) and disposable plates (the cafeteria has reusable plates) and that Lane does a great job recycling metal, plastic, glass, and paper. Thanks for recycling at Lane! Contact: Michael Sims.

MEDS REMINDER

Due to risk of liability, departments should not provide any kind of medication for employees, including, but not limited to over-the-counter pain relievers, anti-inflammatories, antibiotic ointments (Neosporin), and upset stomach medications. The LCC Health Clinic does provide free doses of these types of medications and small quantities also can be purchased in the bookstore. If you have any questions regarding this policy, please contact Sandy Ing-Wiese, ext. 5561 or Dawn Barth, ext. 5528.
