## NEWS AND ANNOUNCEMENTS

### LOBBYVISION IS HERE

At long last, we present for our students LobbyVision in the lobby of Building 1, Student Services. This is a joint effort, long in the making, brought to our students by Counseling and Advising and Enrollment Services. LobbyVision displays a looping PowerPoint presentation on a 42-inch monitor on the wall near our ExpressLane computers. The feedback from students has been extremely positive.

The intent is to have it run just about three minutes and provide timely and critical information for students to stop and view as they come on to campus to stay current with deadlines and information pertaining to their enrollment at Lane.

EARTHQUAKE RELIEF: As many of you know, on May 27th early in the morning, an earthquake hit central Java, in Indonesia. The death toll is near 5,000, over 20,000 people are injured, and 200,000 people are homeless. Government relief efforts are slow, and many private groups and individuals are organizing aid efforts. A long time friend in Bali has sent me a list of reliable sources to send money too. I plan to wire money early next week. There usually is a \$35 fee for the transaction, so if people want to donate money, I

can collect it and send it from Selco next week. Call me if you want to help. I can also e-mail you the link to the reliable donation sites. Bonnie Simoa, x5645, [simoab@lanecc.edu](mailto:simoab@lanecc.edu)

## NEWS AND ANNOUNCEMENTS

### ANNUAL POWER OUTAGE PLANNED

The annual power outage is scheduled for Sunday, August 27. This outage is for Facilities electricians to do maintenance and repair on the switches and transformers. All electric service will be shut down from approximately 7:00 a.m. to 7:00 p.m. Some critical functions have backup generators and in the weeks before the scheduled electrical shutdown, maintenance personnel will check to make sure backup systems are in operating condition.

You should not schedule any activities for August 27 so that the college can be closed. We will send out additional notices and information as the date approaches.

If you have questions regarding the outage, please contact Danny Avalos, Lead Electrician, ext. 5541.

### OCCU SIGNS ON AS PLATINUM SPONSOR OF HARVEST DINNER

Oregon Community Credit Union has earned the distinction of serving as the exclusive platinum sponsor of the Harvest Dinner and Auction with a \$10,000 gift to the Foundation. The fundraiser will be held October 27.

Featured guest chefs will be Caprial and John Pence, owners of Caprial's Bistro in Portland and hosts of the popular OPB program, "Cooking for Family and Friends."

The Foundation will distribute all proceeds to Shining Star scholarships for Lane students, and other college programs.

Oregon Community Credit Union chose to sponsor the 2006 Harvest Dinner and Auction because their mission is to make a difference in the lives of their members and the communities they serve, and they believe strongly that the activities of higher education support that mission by stimulating economic development, knowledge

creation, and the enhancement of community services and activities. As Mandy Jones, Acting CEO, explains, "We are excited about this opportunity to continue our commitment to education and make a difference in the Eugene community through our sponsorship of this year's Harvest Dinner and Auction event." Contact: Kathy Thomas.

## NEWS AND ANNOUNCEMENTS

LCC HOME INTERNET ACCESS (REMOTE ACCESS) TO END ON JUNE 30

The college made hundreds of difficult decisions during this year's budget development process. By now we are all familiar with the drastic cuts to staff and services that were required to address a \$5.9 million shortfall. Home Internet access for faculty and staff is one service that the college decided to eliminate. If you are using the remote dial-up service you will need to make other arrangements for internet access by July 1. Submitted by Stephen F. Pruch, Information Technology Department.

## NEWS AND ANNOUNCEMENTS

### NSF GRANT AWARDED FOR GEOGRAPHIC INFORMATION SYSTEMS TRAINING

Lane Community College has been awarded a three-year grant totaling \$782,144 from the Advanced Technological Education fund of the National Science Foundation to develop coursework in geographic information science (GIS) curricula. The first-year award is \$280,620 and begins July 1, followed by \$269,052 in 2007, and \$232,472 in 2008. The grant project, "Mapping, Analyzing and Problem Solving Using Geographic Information Science: Implementing a GIS Curriculum for Technical Literacy," will bring GIS learning opportunities to students in science, social science and computer information technology.

Geographic information systems are mapping and analysis tools used in a growing number of workplace settings. For example, when a power outage occurs, a connected network finds and directs a location-specific response. When a police department analyzes crime data, it uses GIS software to map crime areas. Anything that has a location can be mapped, from the migratory patterns of whales to brain activity.

In Oregon, GIS is used by planning authorities, public utilities, human services, public safety, forestry, geosciences, and bio-resources. Other occupations increasingly use GIS to create visual-spatial representations of data, solve spatial problems, and combine quantitative data with qualitative analysis and reporting capability.

GIS literacy is low. Three Oregon community colleges provide highly technical training for GIS specialists, and four Oregon universities offer courses for upper division

and graduate students. Entry-level opportunities are few. "Our project will introduce large numbers of community college students to the potential GIS offers in solving significant social and scientific problems," says grant principal investigator Jane Benjamin.

Lane will address the literacy gap in two ways. GIS activities will be integrated into science and social science courses. The first activities should be in place by spring 2007. In addition, a three-course GIS sequence will be developed for articulation with universities. At the end of the grant period, about 700 students per term will be introduced to GIS through the classroom activities or the GIS courses.

Benjamin, a geography instructor, will work with geology instructor Sarah Ulerick; computer technology instructor Linda Loft; and geography instructor Lynn Songer. The team hopes that the GIS activities will encourage underrepresented students in science, technology, engineering and mathematics. These include women, minorities, first-in-family college students, and rural students. Real-world scenarios will demonstrate social and scientific relevance. Collaboration and teamwork will foster the interpersonal and organizational skills that are prized in today's workplace. Benjamin says, "Basic literacy in this rapidly advancing technology will open doors and prepare students with important job skills and future career choices."

Several community partners will serve as advisors on the project, including the Bureau of Land Management, Lane Council of Governments, Weyerhaeuser Company, Eugene Water and Electric Board, Eugene Public Works, Eugene Police Department, Clackamas Community College, University of Oregon, Oregon State University, and Western Oregon University. Submitted by the editor.

#### LCC HOME INTERNET ACCESS (REMOTE ACCESS) TO END ON JUNE 30

The college made hundreds of difficult decisions during this year's budget development process. By now we are all familiar with the drastic cuts to staff and services that were required to address a \$5.9 million shortfall. Home Internet access for faculty and staff is one service that the college decided to eliminate. If you are using the remote dial-up service you will need to make other arrangements for internet access by July 1. Submitted by Stephen F. Pruch, Information Technology Department.

#### MOMENT TAKING SUMMER SUBMISSIONS

The Community College Moment accepts submissions year-round, including summer. We invite creative and scholarly work in all subject areas, and particularly invite works addressing the 2007 theme of technology and society. Technology in its broadest sense is the manner in which a society provides and uses its tools, whether they be hammers, chisels, machines, words, or numbers. What is the role of technology in the community college? What have we learned from past technologies? What should we look for in new technologies? From agriculture and analogs to democracy and the digital age, what are the large and small issues we face concerning technology and society? We also invite queries for interviews, features and reviews. Deadline for submissions is October 2006. For complete details, visit our website at <http://teach.lanecc.edu/ccm/submissions.htm> Contact: Steve McQuiddy.

## NEWS AND ANNOUNCEMENTS

### MICHELL RONNING NAMED OUTSTANDING EMPLOYEE

Congratulations go to June's Classified Employee of the Month, Michell Ronning. A group of representatives of the Classified Professional Development Team and AVP Patrick Lanning interrupted a Family and Health Careers Division meeting to present Michell with the Employee of the Month award for June. Michell is a graduate of Lane's Early Childhood Education program, and has been serving Lane as an employee since September 1984. In 2000 she became the Child Care Center coordinator. Her colleagues noted that in the throes of recent budget news, she kept a cool head, crunching numbers and using her creativity to come up with viable options to proposed cuts. These options included coordination with outside agencies, building better community relationships and better learning opportunities for students in the ECE program. Her easy smile and bubbly personality reflect her excellent customer service. Michell put together an end of the year extravaganza -- that may now become an annual event -- which was a fun-filled family event that doubled as a fundraiser! Outside of work, Michell loves to spend time with her family. That has now come full circle also, as her son, who was in the very first infant classroom at Lane 20 years ago, is now taking credit classes here as an adult! When you see Michell, congratulate her for doing a terrific job and celebrate her nomination as June's Classified Employee of the Month. And remember that, you too, can help us to recognize exemplary Classified employees by nominating them for this award. Nomination forms are available: 1) at the Human Resources office; 2) on the CPDT website: <http://www.lanecc.edu/cpdt/eom.html>

### LONGHOUSE GROUNDBREAKING SET FOR JUNE 21

The Lane Community College Foundation and the Native American Student Association invite tribal elders and members, students, staff and the community to a groundbreaking ceremony for the Lane Native American Longhouse on Wednesday, June 21, at 10 a.m. The site overlooks the track, northwest corner of main campus. Ceremonies will include drumming and singing followed by a reception.

The longhouse will be the first on a community college campus that is not part of a tribal college.

Students at Lane represent each of Oregon's nine tribes and other tribes from across the country. The college is known for a strong Native American education program. Building a longhouse will enhance the program, benefit all students on campus, and provide additional meeting space for local community groups.

The entry for the 6,200-square-foot longhouse is a hall of honor which will feature the art and culture of Oregon's nine tribes. In keeping with Native American tradition, the longhouse will face cardinal east with an eastern entrance for traditional ceremonies. An indoor-outdoor kitchen allows space for community potlucks. The main hall is big enough for dancing, drumming and other traditional activities. Dressing room space is provided for dancers to don traditional regalia. Outdoor classroom space is planned adjacent to the building.

The architectural firm, StastnyBrun, also designed the Portland State University Native American Center and the Warm Springs Museum. The firm also has a contract to design a heritage center and museum for the Confederated Tribe of Siletz Indians.

Funding will come from a variety of sources. Approximately \$290,000 has been raised through donations from students, staff and Oregon tribes. Lane's Board of Education is contributing \$250,000 from the college's capital repair and improvement fund. In May, students approved a \$3, three-year fee to raise \$225,000 to \$300,000. College facilities staff will construct the longhouse, providing additional savings. The Longhouse Fundraising Committee is now focused on obtaining in-kind contributions of materials to meet the \$1.2 million goal.

Major donors include the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians; Confederated Tribes of the Grand Ronde Spirit Mountain Community Fund; Confederated Tribes of the Siletz Indians; Coquille Indian Tribe; and Cow Creek Band of Umpqua Tribe of Indians. Other major donors include the Oregon Country Fair, Oregon Cultural Trust, Santa Fe Tobacco Co. Foundation, and the Willamette National Forest. Several groups at Lane have contributed, including the American Indian Languages Program, Associated Students of Lane Community College, College Operations, Counseling Department, Information Technology Program, Board of Education, and the Native American Student Association. In-kind material donors include Leavitt's Trucking, McFarland Cascade, Moshofsky Truss, Wildish Construction Co., Farwest Steel, and others. Many individuals also have donated to the project.

For more information, see [www.lanecc.edu/nasa/longhouse](http://www.lanecc.edu/nasa/longhouse)

## NEWS AND ANNOUNCEMENTS

### WASTEWATER TREATMENT PLANT UNDERGOING UPGRADE

The construction work next to Gonyea Road at the west entrance to the college is the new wastewater treatment plant. The college has contracted with 2G Construction of Eugene to build the plant for \$1.8 million. Funds for this work will come from the bond project account. The new plant will treat wastewater through a natural process. After treatment, the discharge will be held in the ponds or pumped into Russell Creek. The water stored in the ponds will be of a high enough quality that it can be used to irrigate the athletic fields during the summer without any harmful effects to people coming in contact with it. The schedule calls for work to be completed by next December. Some short interruptions of traffic will occur as trucks bring materials to and away from the site. Precautions will be taken to ensure the safety of everyone during the interruptions. Bob Mention, ext. 5747.

### FOUNDATION'S FINANCIAL REPORTING SYSTEM TO BE DOWN

The Foundation's financial reporting system will be unavailable for several weeks this month. Please request any reports for your Foundation accounts no later than June 21. Thank you, Jeri Steele, 5810.

### SPECIALIZED EMPLOYMENT SERVICES HAS A NAME CHANGE

Specialized Employment Services will become Specialized Support Services effective July 1. Our new name will better reflect the expanded services we provide for students who require intensive support. Please note that everything will remain the same, same phone numbers, same work sites and office locations. We want the campus community to know that we are still here providing many of the same services we have always done, just under our new name! Rick Venturi, 5101.

### CENTER ROOF REPLACEMENT

Last summer, 2G Construction completed the west and south sides of the Center building roof. This summer, 2G Construction will begin work on the east and north sides

beginning June 16 with erection of scaffolding on the east side of the building, starting from the south end and continuing to the north side. The contractor will provide barricades around the work site and scaffolding. The project consists of demolition of the wood shakes and removal of felt-containing asbestos during evening hours, installation of a new metal siding, replacing current skylights with new skylight systems, and replacement of the window on the north side with a double-pane window. The project is expected to be complete by September 15.

Please be cautious around the east and north sides of the building during construction. For construction related questions, contact Todd Smith, ext. 5132 or [smitht@lanecc.edu](mailto:smitht@lanecc.edu).

#### **PRINT SHOP AND WAREHOUSE TO CLOSE FOR TWO-DAY INVENTORY**

Printing/Graphics services will not be available during the department's annual inventory Wednesday, June 28 and Thursday, June 29. The college's Warehouse Services also will conduct inventory the same days, and merchandise will not be available for purchase. UPS and FedX delivery service will continue without interruption. Regular operations in both departments will resume Monday, July 3. For more information, contact Tom Johnson, 463-5373 or Gary Anderson, 463-5374.

#### LCC HOME INTERNET ACCESS (REMOTE ACCESS) TO END ON JUNE 30

The college made hundreds of difficult decisions during this year's budget development process. By now we are all familiar with the drastic cuts to staff and services that were required to address a \$5.9 million shortfall. Home internet access for faculty and staff is one service that the college decided to eliminate. If you are using the remote dial-up service you will need to make other arrangements for internet access by July 1. Several staff have asked about options for internet service provider (ISP) service. This site <http://www.ispcomparison.net/index.html> has information that we hope you will find useful. Submitted by Stephen F. Pruch, Information Technology Department

## LCC HOME INTERNET ACCESS (REMOTE ACCESS) TO END ON JUNE 30

The college made hundreds of difficult decisions during this year's budget development process. By now we are all familiar with the drastic cuts to staff and services that were required to address a \$5.9 million shortfall. Home internet access for faculty and staff is one service that the college decided to eliminate. If you are using the remote dial-up service you will need to make other arrangements for internet access by July 1. Several staff have asked about options for internet service provider (ISP) service. The site at <http://www.ispcomparison.net/index.html> has information that we hope you will find useful. Submitted by Stephen F. Pruch, Information Technology Department
