Eugene Campus

LCC Begins A

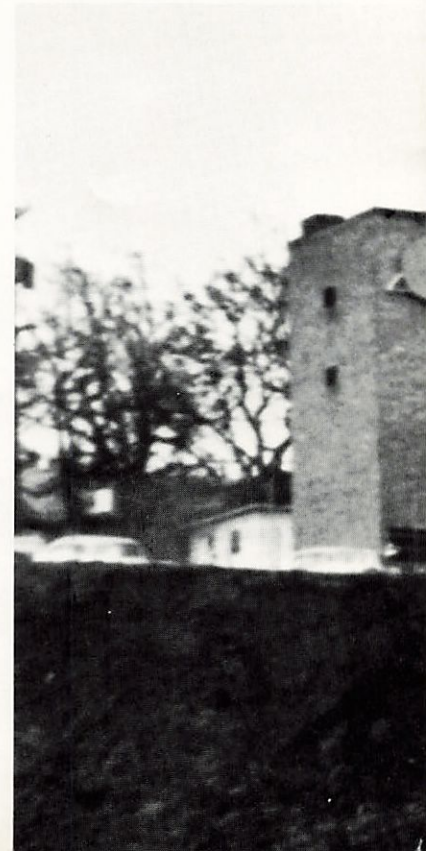

How did all this happen?

It's been only a little over a year since Lane Community College grew from a mere idea into a full-fledged institution of higher learning.

First there were committee meetings, studies by educators and planners. Then came the formation of the college district by a vote of the people. The district covers all of Lane and parts of Benton, Linn and Douglas counties, an area with a growing population of over 200,000 people. It is controlled by a seven member Board of Directors. The President is Dr. Dale Parnell.

Actual fiscal operation began July 1, 1965, an important date in LCC history. On that day a dedication ceremony was held on the Eugene campus at which time the Eugene Technical Vocational School became a part of the new college. On that day the twelve month personnel reported for duty and from then on counselors were on hand to talk to prospective students.

On September 20, 1965, students began registering for fall classes and the term officially opened on

the 27th. On its opening day LCC was already the second largest community college in the state of Oregon.

By October Lane had about 1400 day students and 2600 evening enrollees. Besides the Eugene and Springfield campuses, there were classrooms at some fifteen locations throughout the district.

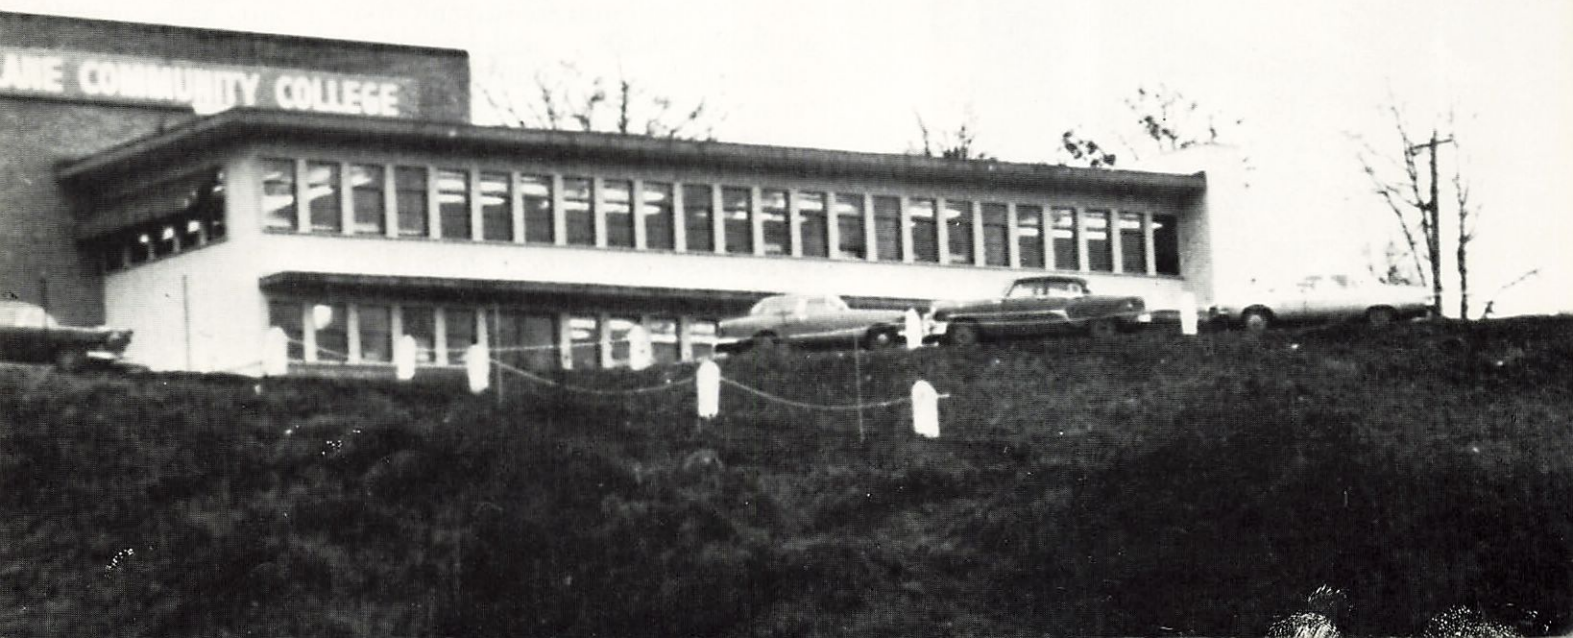

A red-letter day was March 17, 1965, when Mr. Wilfred Gonyea, prominent Eugene citizen, donated a 100-acre tract of land south of Eugene on the interstate 5 freeway to the college for a future campus. A short time later the district added 50 more acres adjoining that property. Balzhiser Seder and Rhodes, local architects, are planning the initial phase of the new campus for which an enrollment limit of 6500 has been set. Present plans call for occupation of the new campus by fall, 1968, and an estimated 3000 students.

During the year an active student body association has been developed at Lane. Three publications - a weekly newsletter, The Titan Round-up, a monthly newspaper, The TORCH, and THE TITAN yearbook have all been started.

From this kaleidoscope of events, the first year students will always remember Lane Community College and be proud that they have been a part of this momentous year.

New Era

Springfield Campus

Directors Establish Policy

L to R - Robert Ackerman, Springfield; Mrs. Olga Freeman, Eugene; Dr. Dean Webb, Cottage Grove; William Bristow Jr., Eugene, Chairman; Lyle Swetland, Eugene; Dr. Clifford Matson, Junction City; Dr. Albert Brauer, Florence; Dr. Parnell, president.

President's Message

Dr. Dale Parnell

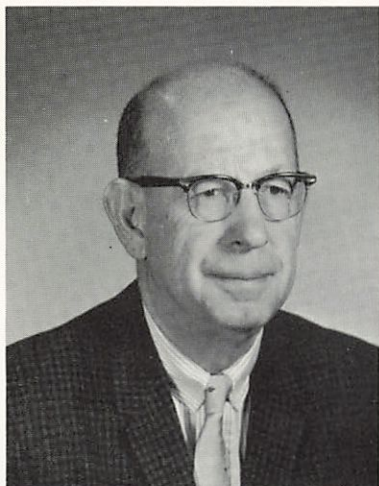

Lane Community College is in the process of developing an exciting new concept in higher education: the concept that this College will provide higher educational opportunities at many levels for all citizens of our geographic area. Everyone connected with the College during this first year has played a unique role in this development, for concept can only become reality through the involvement of individuals.

Participation in LCC affairs has not been limited to staff and students. Representatives of local service organizations, the University of Oregon and institutions, local school districts, advisory committees, and civic groups have joined College Board members and Administrators to develop LCC as an outstanding Community College.

Already Lane Community College is gaining a reputation for quality amid great diversity in education. Much of this success in the initial year of operation can be attributed to the efforts of so many people working in harmony to support the creation of a unique college.

The average age of LCC students for the 1965-66 college year is 25 years, which indicates that the very people who have given active support to the establishment of the College are benefiting directly as students.

This publication, the first in the history of LCC, is an attempt on the part of students to depict the people and activities. Congratulations must be extended to those that have labored so diligently to make this a success.

Mabel Kennedy
Registrar

The individual student is very important at Lane Community College. For this reason the counseling staff is large enough to enable each student to reach a counselor easily without an appointment on any school day, or at other times if necessary. With a ratio of about one counselor to every 250 students, a great deal of individual counseling is possible: (to quote from a prominent contemporary educator)

"It is the development of the individual person - his mind, his special talents. . .it is this education with which we are essentially concerned."

It is through the counseling staff that the individual is given the attention and help that he needs. As the student body increases, the counseling staff will grow in proportion, so that no one will be lost in the crowd.

One of the most popular courses in the college this year is Business Education with over 300 students enrolled either full or part-time. Both technical and college transfer are offered in this division, which is headed by Mrs. Ruth Thygesen. A course in Salesmanship was included winter term. Accounting and Introduction to Business are the college transfer courses offered. The three basic technical courses are Shorthand, Bookkeeping and Typing.

Toward the end of the year future employers often visit the campus to recruit L.C.C. business education students for immediate employment after graduation. Personnel people from the Seattle Boeing Aircraft Company and others were on the campus this year for several days seeking future employees.

As well-trained business education people are in great demand, the school has little difficulty in placing its graduates.

Student receives advise from an instructor.

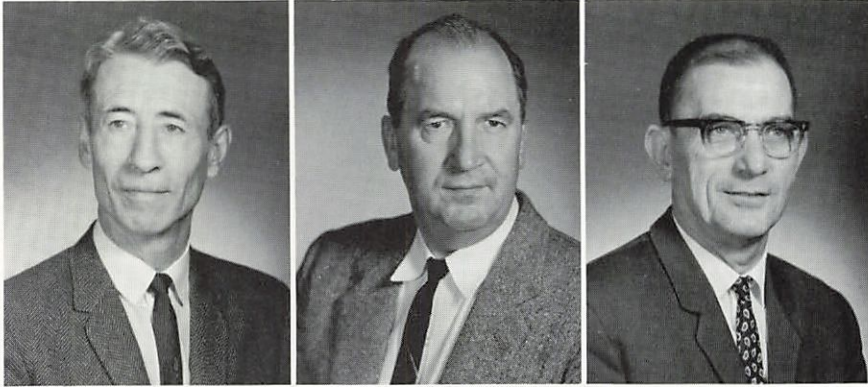

Mrs. Thygesen reads instruction to students.

In addition to the regular college transfer courses in English Composition, English Literature and Speech, technical courses in Communications Skills, Technical Report Writing and Police Report Writing are offered.

Recognizing the importance of communication in the modern world, L.C.C. endeavors through its curriculum to improve

the student's speaking, writing, listening, and reading skills in order that he may perform competently in the field he is entering.

If he plans to continue working toward a degree in a four-year college, he may take the required freshman and sophomore English courses at L.C.C.

Mr. John E. Howard heads the division.

How many times have I told you not to use a pencil!

You like English?

Drafting students draw plans for the future

Student adds finishing touches to his project.

Cabinetmaking and Carpentry courses are offered by L.C.C., in addition to two-year courses in Technical Drafting and Civil and Structural Engineering Technician. Those who complete the entire two-year program in any of these courses are ready for employment or placement as apprentices in their fields.

Chairman of the division is Mr. Carl

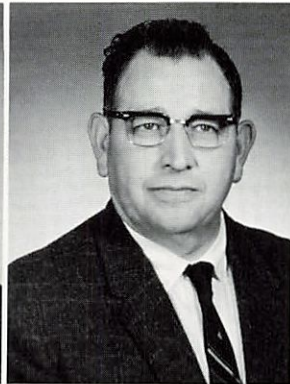

Blood, drafting instructor, who was with the Eugene Technical Vocational school for three years previous to the inception of Lane Community College.

Technical drafting graduates are in demand by many industries, who send recruiters to the campus every spring to employ men.

Student uses carpentry facilities to finish a cabinet.

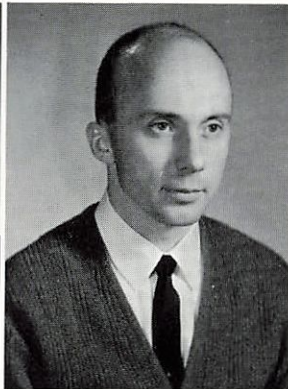

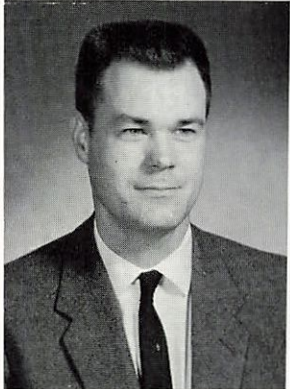

Electronics Improve Living

Roger Houglum, Division
Chairman

Patrick Grant, Appliance
Repair

James Huntington
Electronics

Darwin McCarroll
Radio & TV Repair

Lee Trippett
Electronics

Headed by Mr. Roger Houglum, manager and chief engineer of Educational Radio Station KRVM, the Electronics Division includes several two-year technical courses.

The Electronic Engineering Technician course prepares students for the important electronics industry. Most electronics graduates are hired by such firms as Boeing Aircraft and the great complex of electronic industries centered in the San Francisco Bay area.

Other offerings in the Electronics Division include the Radio Communications course, which gives basic instruction nec-

essary for entry into the radio broadcasting field.

LCC graduates in radio broadcasting not only find jobs in Oregon but throughout the West Coast area. Many of these have advanced to such key positions as station manager, chief engineer, sales manager and program director.

Radio and Television Repair is another course in the Electronics Division. Graduates of this curriculum are prepared for entry jobs in radio and television repair.

Major and Small Appliance Repair courses are also in this division.

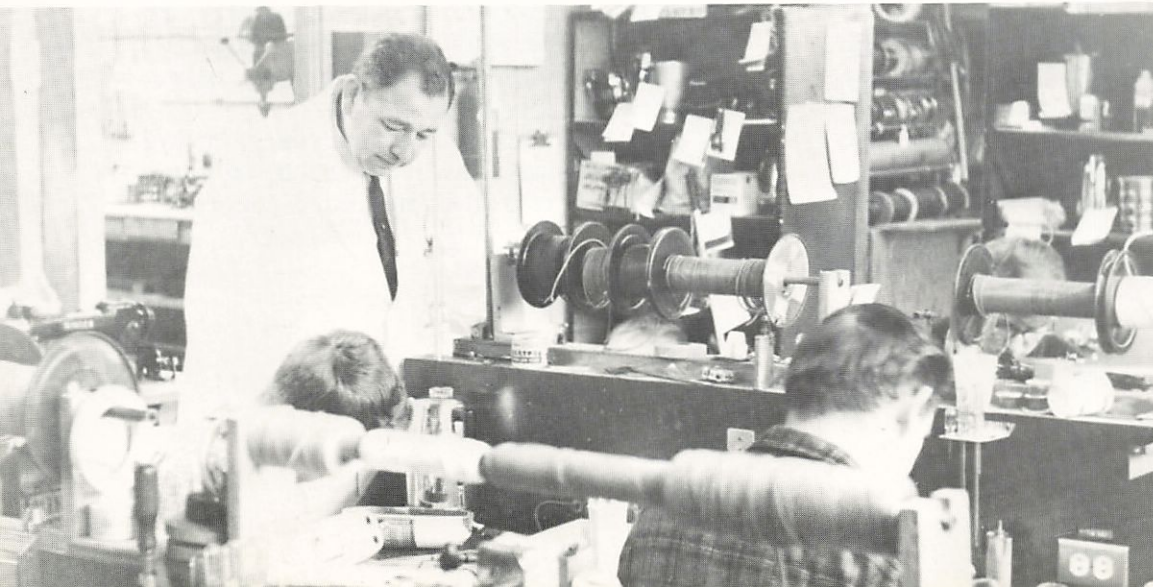

Mr. James Huntington instructs students in the theory of electronics.

Students learn how to repair radios and T.V.s.

Mr. Patrick Grant teaches students to repair appliances.

A wide variety of Physical Education courses are listed for both men and women at Lane under the direction of Cecil Hodges, Division Chairman.

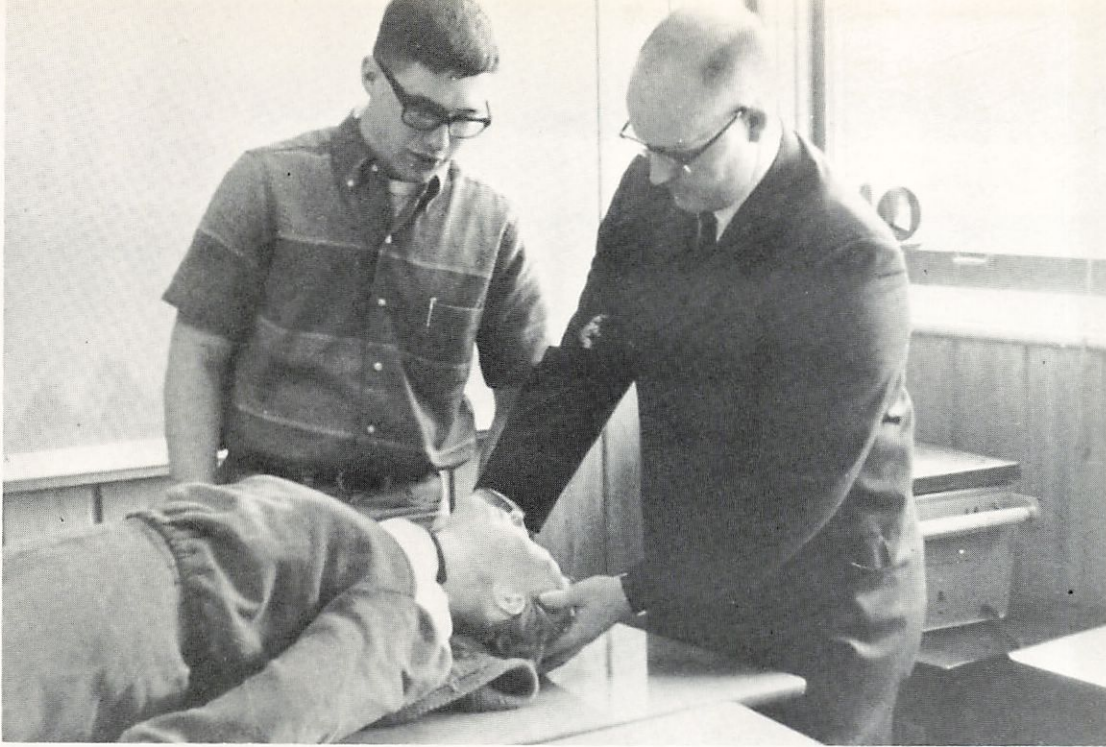

College transfer Physical Education for men includes football, basketball, softball, and track in season, and other sports such as swimming, tennis, golf, badminton, volleyball, body building, gymnastics, and handball.

Women's classes include swimming, tennis, body mechanics, gymnastics, basketball, volleyball, and others.

A combined class in folk dancing for both men and women was given by Miss Daggett. Winter term the combined men and women's classes were bowling. Tennis and swimming have also been given co-educationally.

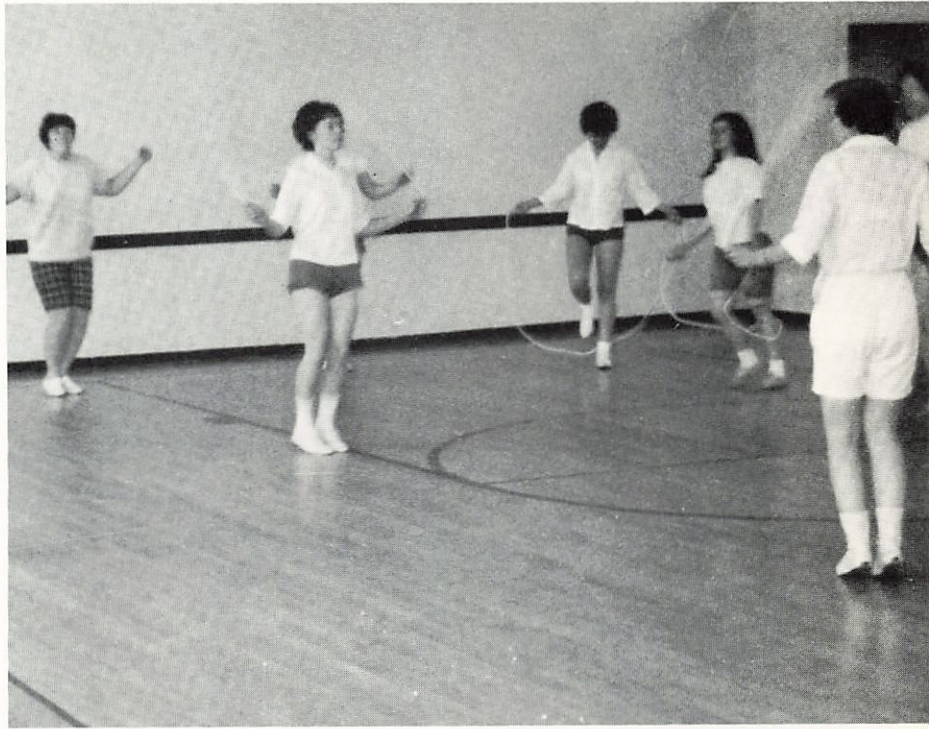

The one-year program in practical Nursing which is accredited by the Oregon State Board of Nursing, is included in the Health and Physical Education division. The course prepares students to take the State Board Examinations for licensure in Oregon. Sacred Heart General Hospital cooperates with the college in giving the students the major portion of their clinical practice. Mrs. Ellene Goldsmith is head of this program. With the constantly increasing demand for nursing care, this course fills a vital need in this area.

First Aid and Health courses carrying college transfer as well as technical credit, are also a part of the Physical Education division.

NOT SHOWN: Merlin Ames, Fry Cook; Mauring Bayes, Clerk Stenographer; J. F. Davies, Study Skills Center; Daryl Jessart, Engine Repair; Hazel Stevenson, Basic Education; Jack Wolfe, Stock Clerk.

Glenda Smith is capped during Dental Assistant's capping ceremony.

What is MDTA? This is a frequently asked question by students. This is the answer: It is a program for training unemployed and underemployed workers, which was established by the Manpower Development and Training Act of 1962.

MDTA uses federal funds that are administered at the local level through the combined efforts of the Oregon State Employment Service and Lane Community College.

The purpose of the act is (1) to provide trained personnel for jobs which remain unfilled because too few are trained; (2) to up-date skills of workers whose skills have

been out-dated by automation or other economic changes such as foreign competition, relocation of industry or shifts in market demands; (3) to help train the unusually large number of young people who will be entering the work force in the next 10 years.

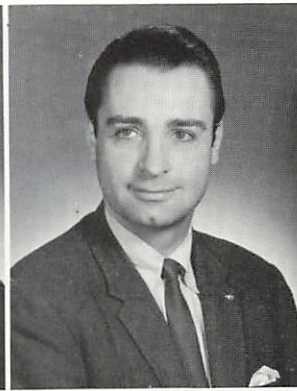

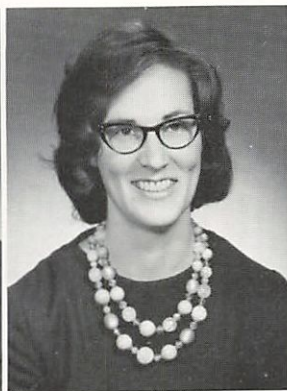

The following courses are offered: Basic Education, Dental Assistant, Electrical Appliance Repair, Forestry aide, Fry Cook, Gas Engine Repair, General Office Clerk, Sales Person, Stock Clerk, and Clerk Stenographer.

Director of MDTA on the Lane campus is Mr. Robert Marshall. Mr. W. G. Bailey is MDTA counselor.

Students participating in sensitivity experiment

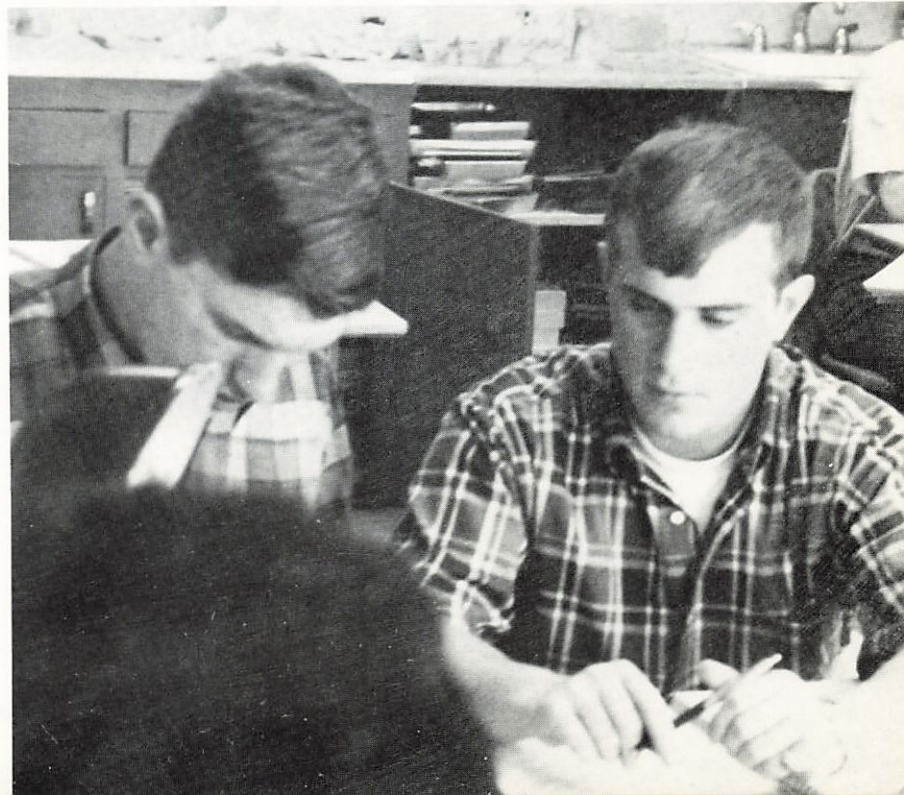

This division, with Mr. John Jacobs as chairman, offers college mathematics courses such as Intermediate and College Algebra, Geometry, Calculus and Trigonometry. Math II and Math III, and Technical Math are related to the vocational courses and offered on the Eugene campus.

Science offerings include Physical Science, Biology, Botany, Zoology and Chemistry, all carrying college credit. Practical and Applied Physics, which are related to the vocational courses are also offered on the Eugene campus.

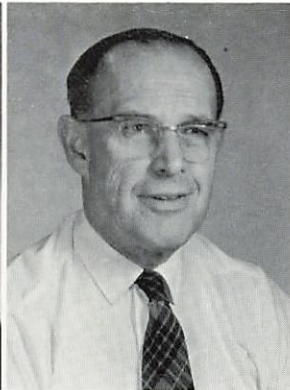

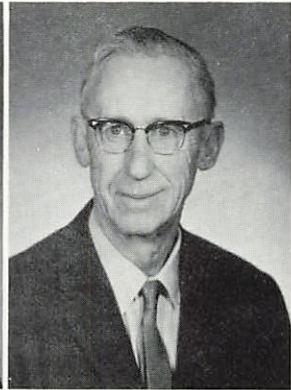

Mrs. Gibson looks on as demonstration is performed.

Machine Shop
& Diesel
Marvin Winger
Auto Mechanics

Students hard at work in the Auto Mechanics shop.

Men from LCC's mechanics division are filling vital spots in industry and transportation all over the west from Alaska to the Mexican border.

Much in demand are the A&P graduates who have their choice of jobs when they complete their training. Jobs are also waiting for men from the Automotive, Diesel and Machine Shop departments.

Chairman of this division is Melvin Gaskill, who was the with the Eugene Vocational-Technical school for 20 years before it became part of Lane Community College.

Airframe and Power Plant, or A&P courses prepare the student for employment a line mechanic or service mechanic in the aviation field. The curriculum is approved

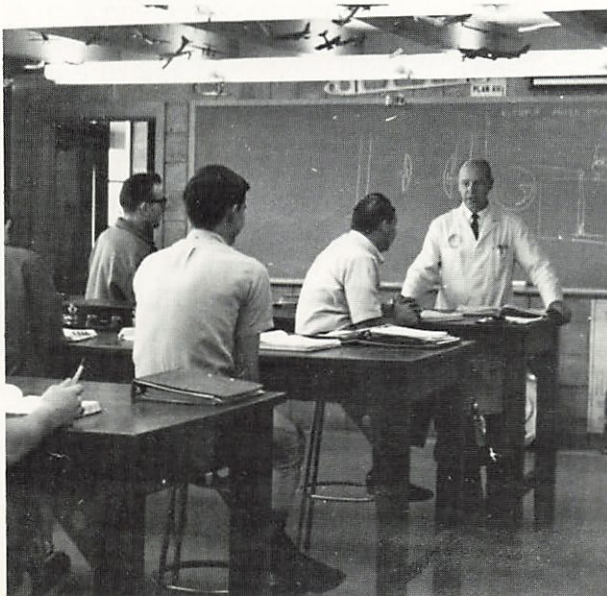

by the Federal Aviation Agency, and trains students to take the FAA exams for A&P certificates.

Popular two-year courses which fill up long before school starts every year are Auto Mechanics, Auto Body & Fender and Diesel. With the ever-expanding number of autos, the demand for auto mechanics with good training is constantly increasing. Auto Body & Fender prepares men for employment in specialty repair and paint shops.

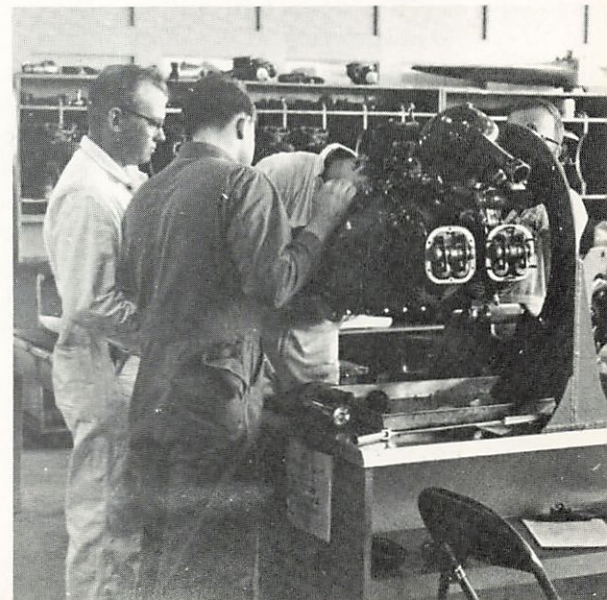

Diesel Mechanics trains men to enter occupations leading to heavy equipment repair and maintenance jobs.

Machine Shop prepares the Student for jobs in machine shops or related industries.

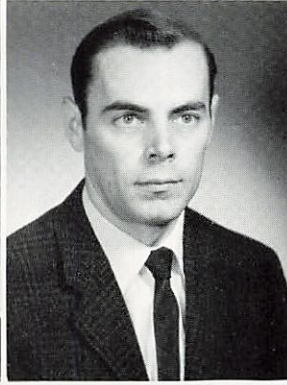

Mr. Gaskill lectures a class in Airframe and Powerplant.

Students work on engine assembly in Mechanics.

In the Social Science Division the curriculum explains man himself. Each course examines a specific aspect of human existence. Ranging from Psychology, a study of the individual, through Sociology Political Science, Economics and Geography other social science courses study man as he relates with other men and his environment. Also included in this division are the history courses which study man's past. In addition to the college transfer program, which

carry credit transferable to degree-granting colleges and universities, several courses are offered to occupational students to enrich their programs with general knowledge of psychology and economics.

Included also in the division is a law enforcement training program which trains police officers. Staff members for this course are hired from the Eugene Police Department and city attorneys office.

Activities

Two New Publications Are Born

Donna Miller, John Lively and Lucinda Young put finishing touches on year book.

"THE TORCH" Newspaper published Volume I, #1 in November 1965, and came out monthly all year. The staff was entirely voluntary, and during the year twenty or thirty students helped put out the paper. Editor fall term was Patricia Bennett, and Kathy Downing succeeded her during winter term. Advertising managers were John Thomas and Karen Thornton. Members of the staff were Dave Little, Pat Norris, Dave Spriggs, Dave Duhrkoop, Zee Belisle, Tom Black, Thomas Hill, Dan Wagner, Marian Hermanson, Bart Mahan, Bob Campbell, Mike Olund, Ardythe Tym, Teressa Ray, Steve Meeks, Lucinda Yound and others.

Paper staff discusses next issue of paper.

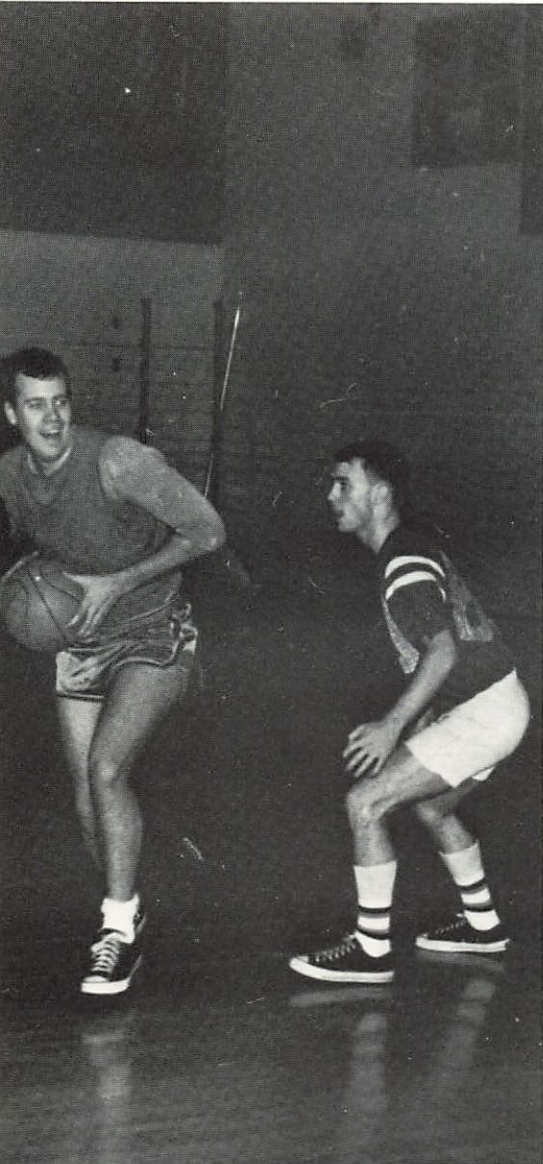

Mrs. Dixon, publications adviser makes arrangements for photographers.

"THE TITAN" was the name selected by the students for the yearbook. Work on the book started in January and all sixty pages were mailed to the publisher March 25. John Lively was editor, assisted by Donna Miller, Karen Moe, and Marian Hermanson wrote the history. Photographer was Dave Taylor.

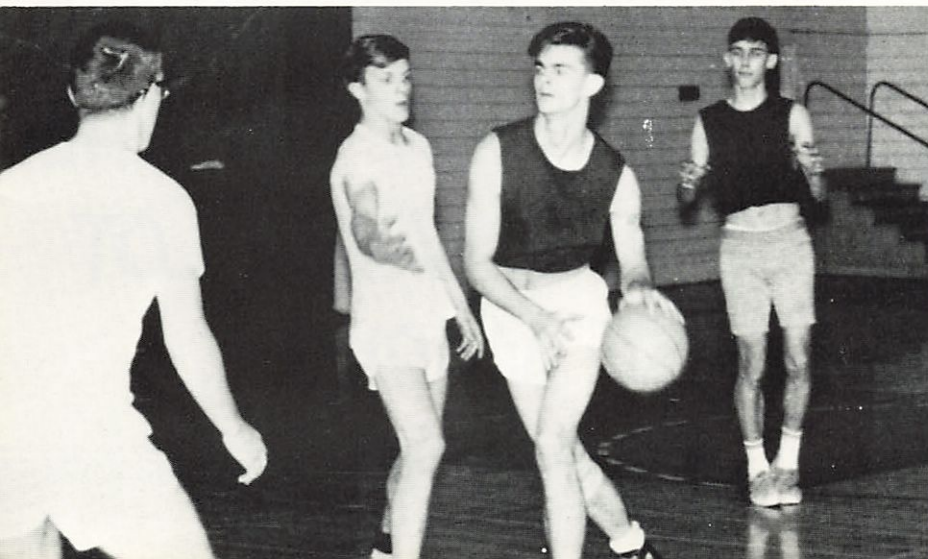

Sports Provide Activity

The first year at LCC saw the emergence of intramural sports. In the fall, football held the spotlight. The team from the Thurston District took team honors. During winter term basketball was the featured sport. The team play was dominated by the team from the South Lane District. Play was concluded with the All-Star game. Spring term track and baseball were the main sports.

Bob Counts guards against Gary Bates' pass.

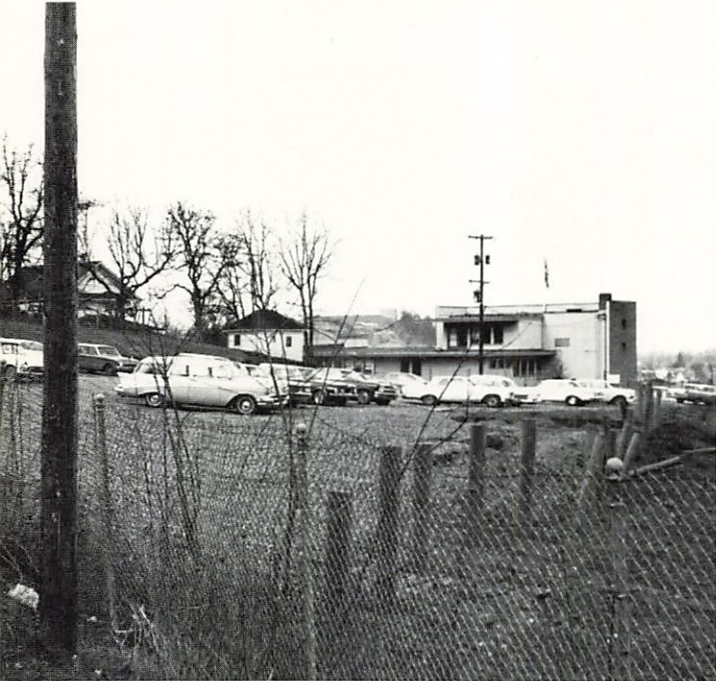

The team from District 3 works against the team from District 5.

The Region 3 team controls the tip.

The Automobile Is Here To Stay

A long view of the Springfield parking lot.

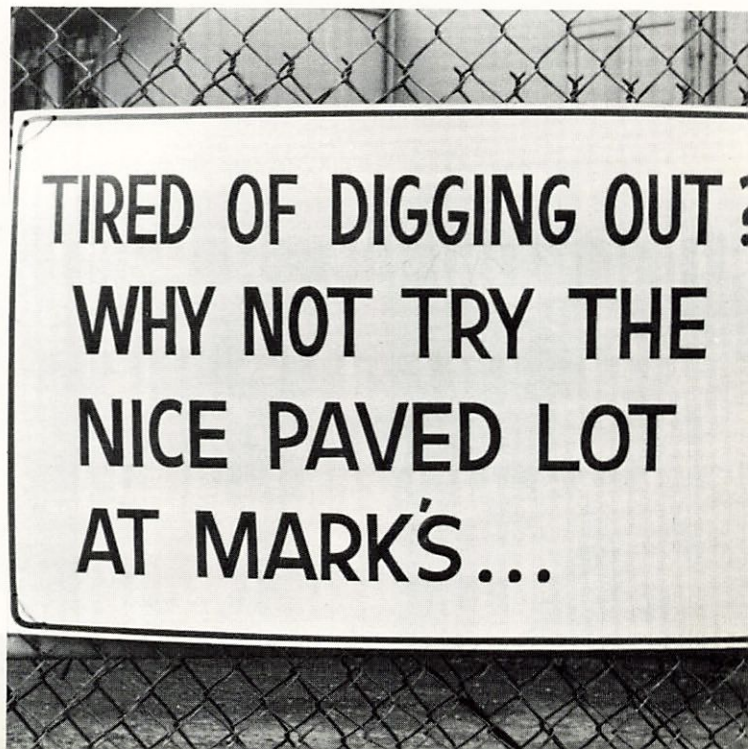

Every niche is filled on a school day with some kind of vehicle.

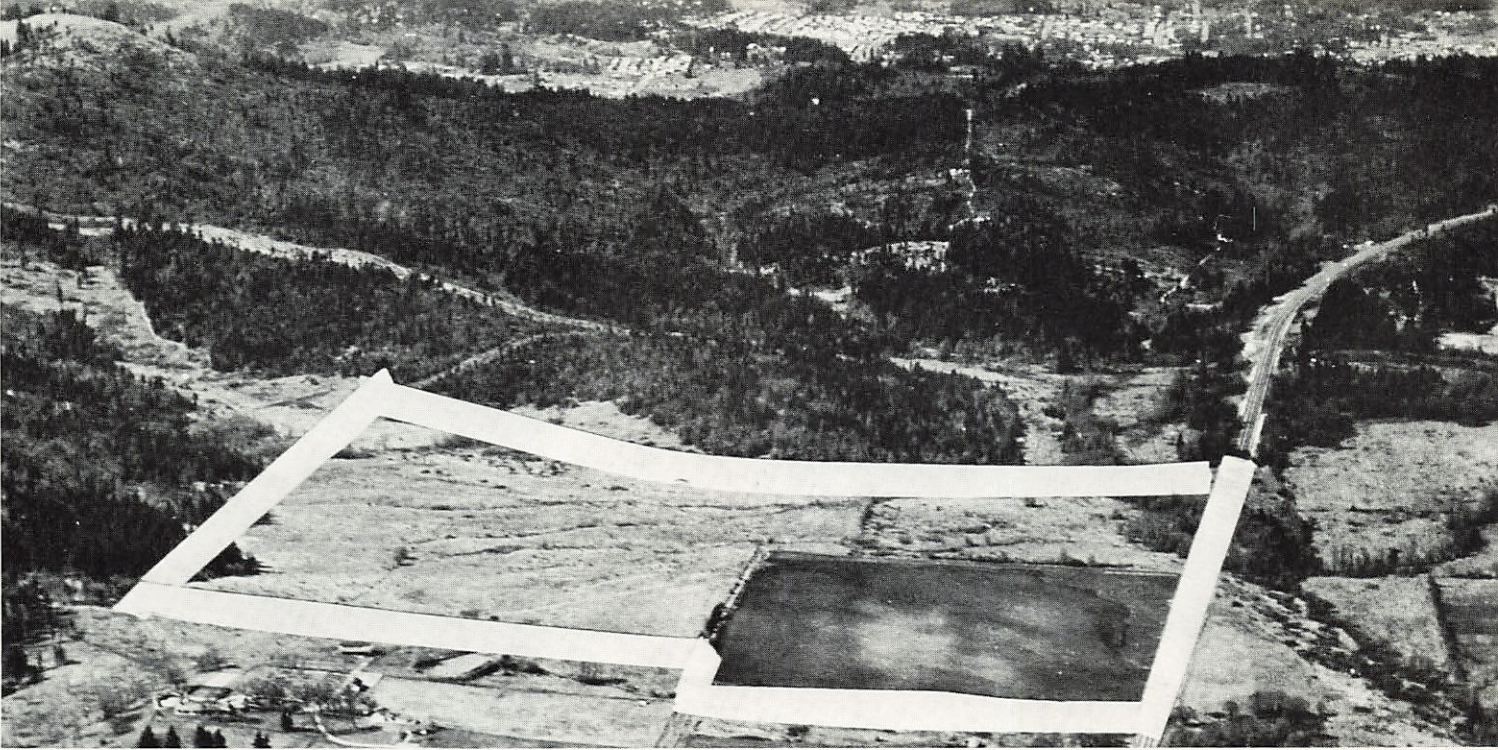

L. C. C. is known as a commuters college. Most students live at home and drive anything from a Honda to a pre-owned Cadillac to school. Parking is a problem on both campuses.

All roads with mud holes lead to L. C. C.

Of course you can always do this.

New land site for L. C. C. Campus.

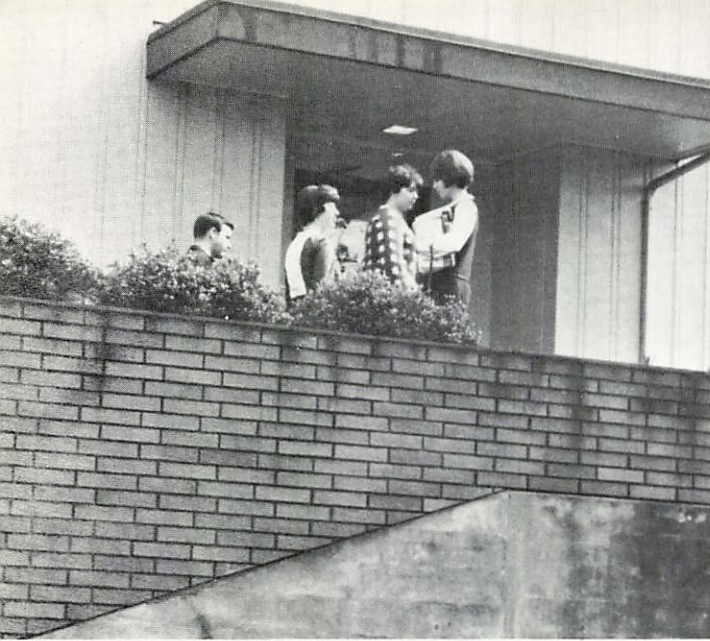

Pat Norris and Marty Cotten receive autographs from Governor Mark Hatfield.

President Parnell breaks ground for the new campus.
